
FATF

The Financial Action Task Force (FATF) is an independent inter-governmental body that develops and promotes policies to protect the global financial system against money laundering, terrorist financing and the financing of proliferation of weapons of mass destruction. The FATF Recommendations are recognised as the global anti-

METHODOLOGY

FOR ASSESSING TECHNICAL COMPLIANCE WITH THE FATF RECOMMENDATIONS AND THE EFFECTIVENESS OF AML/CFT SYSTEMS

ADOPTED IN FEBRUARY 2013

Updated June 2023

TABLE OF ACRONYMS

AML/CFT	Anti-Money Laundering / Countering the Financing of Terrorism (also used for)
BNI	Bearer-Negotiable Instrument
CDD	Customer Due Diligence
CFT	Countering the financing of terrorism
DNFBP	Designated Non-Financial Business or Profession
FATF	Financial Action Task Force
FIU	Financial Intelligence Unit
IO	Immediate Outcome
IN	Interpretive Note
ML	Money Laundering
MOU	Memorandum of Understanding
MVTS	Money or Value Transfer Service(s)
NPO	Non-Profit Organisation
Palermo Convention	The United Nations Convention against Transnational Organized Crime 2000
PEP	Politically Exposed Person
R.	Recommendation
RBA	Risk-Based Approach
SRB	Self-Regulating Bodies
STR	Suspicious Transaction Report
TCSP	Trust and Company Service Provider
Terrorist Financing Convention	The International Convention for the Suppression of the Financing of Terrorism 1999
TF	Terrorist Financing
UN	United Nations
UNSCR	United Nations Security Council Resolutions
VASP	Virtual Asset Service Provider
Vienna Convention	The United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances 1988

INTRODUCTION

1. This document provides the basis for undertaking assessments of technical compliance with the revised FATF Recommendations, adopted in February 2012, and for reviewing the level of effectiveness of a country's Anti-Money Laundering / Countering the Financing of Terrorism (AML/CFT) system. It consists of three sections. This first section is an introduction, giving an overview of the assessment Methodology[1], its background, and how it will be used in evaluations/assessments. The second section sets out the criteria for assessing technical compliance with each of the FATF Recommendations. The third section sets out the outcomes, indicators, data and other factors used to assess the effectiveness of the implementation of the FATF Recommendations. The processes and procedures for Mutual Evaluations are set out in a separate document.

2. For its 4th round of mutual evaluations, the FATF has adopted complementary approaches for assessing technical compliance with the FATF Recommendations, and for assessing whether and how the AML/CFT system is effective. Therefore, the Methodology comprises two components:

- The technical compliance assessment addresses the specific requirements of the FATF Recommendations, principally as they relate to the relevant legal and ins

relation to technical assistance needs. This Methodology is also informed by the experience of the FATF, the FATF-style regional bodies (FSRBs), the International Monetary Fund and the World Bank in conducting assessments of compliance with earlier versions of the FATF Recommendations.

RISK AND CONTEXT

5. The starting point for every assessment is the assessors' initial understanding of the country's risks and context, in the widest sense, and elements which contribute to them. This includes:

- the nature and extent of the money laundering and terrorist financing risks ;
- the circumstances of the country, which affect the of different Recommendations (the makeup of its economy and its financial sector);
- which underpin the AML/CFT system; and
- which could influence the way AML/CFT measures are implemented and how effective they are.

6. The ML/TF are critically relevant to evaluating technical compliance with Recommendation 1 and the risk-based elements of other Recommendations, and to assess effectiveness. Assessors should consider the nature and extent of the money laundering and terrorist financing risk factors to the country at the outset of the assessment, and throughout the assessment process. Relevant factors can include the level and type of proceeds-generating crime in the country; the terrorist groups active or raising funds in the country; exposure to cross-border flows of criminal or illicit assets.

7. Assessors should use the country's own assessment(s) of its risks as an initial basis for understanding the risks, but should not uncritically accept a country's risk assessment as correct, and need not follow all its conclusions. Assessors should also note the guidance in paragraph 16, below on how to evaluate risk assessments in the context of Recommendation 1 and Immediate Outcome 1. There may be cases where assessors cannot conclude that the country's assessment is reasonable, or where the country's assessment is insufficient or non-existent. In such situations, they should consult closely with the national authorities to try to reach a common understanding of what are the key risks within the jurisdiction. If there is no agreement, or if they cannot conclude that the country's assessment is reasonable, then assessors should clearly explain any differences of understanding, and their reasoning on these, in the Mutual Evaluation Report (MER); and should use their understanding of the risks as a basis for assessing the other risk-based elements (e.g. risk-based supervision).

8. Assessors should also consider issues of , including, for example, the relative importance of different parts of the financial sector and different DNFBPs; the size, integration and make-up of the financial sector; the relative importance of different types of financial products or institutions; the amount of business which is domestic or cross-border; the extent to which the economy is cash-based; and estimates of the size of the informal sector and/or shadow economy. Assessors should also be aware of population size, the country's level of development, geographical factors, and trading or cultural links. Assessors should consider the relative importance of different sectors and issues in the assessment of both technical compliance and of effectiveness. The most important and relevant issues to the country should be given more weight when determining ratings

for technical compliance, and more attention should be given to the most important areas when assessing effectiveness, as set out below.

9. An effective AML/CFT system normally requires certain to be in place, for example: political stability; a high-level commitment to address AML/CFT issues; stable institutions with accountability, integrity, and transparency; the rule of law; and a capable, independent and efficient judicial system. The lack of such structural elements, or significant weaknesses and shortcomings in the general framework, may significantly hinder the implementation of an effective AML/CFT framework; and, where assessors identify a lack of compliance or effectiveness, missing structural elements may be a reason for this and should be identified in the MER, where relevant.

10. that might significantly influence the effectiveness of a country's AML/CFT measures include the maturity and sophistication of the regulatory and supervisory regime in the country; the level of corruption and the impact of measures to combat corruption; or the level of financial exclusion. Such factors may affect the ML/FT risks and increase or reduce the effectiveness of AML/CFT measures.

11. Assessors should consider the contextual factors above, including the risks, issues of materiality, structural elements, and other contextual factors, to reach a general understanding of the context in which the country's AML/CFT system operates. These factors may influence which issues assessors consider to be material or higher-risk, and consequently will help assessors determine where to focus their attention in the course of an assessment. Some particularly relevant contextual factors are noted in the context of individual immediate outcomes addressed in the effectiveness component of this Methodology. Assessors should be cautious regarding the information used when considering how these risk and contextual factors might affect a country's evaluation, particularly in cases where they materially affect the conclusions. Assessors should take the country's views into account, but should review them critically, and should also refer to other credible or reliable sources of information (e.g. from international institutions or major authoritative publications), preferably using multiple sources. Based on these elements the assessors should make their own judgement of the context in which the country's AML/CFT system operates, and should make this analysis clear and explicit in the MER.

12. Risk, materiality, and structural or contextual factors may in some cases explain why a country is compliant or non-compliant, or why a country's level of effectiveness is higher or lower than might be expected, on the basis of the country's level of technical compliance. These factors may be an important part of the explanation why the country is performing well or poorly, and an important element of assessors' recommendations about how effectiveness can be improved. Ratings of both technical compliance and effectiveness are judged on a universal standard applied to all countries. An unfavourable context (where there are missing structural elements), may undermine compliance and effectiveness. However, risks and materiality, and structural or other contextual factors should not be an excuse for poor or uneven implementation of the FATF standards. Assessors should make clear in the MER which factors they have taken into account; why and how they have done so, and the information sources used when considering them.

GENERAL INTERPRETATION AND GUIDANCE

13. A full set of definitions from the FATF Recommendations are included in the Glossary which accompanies the Recommendations. Assessors should also take note of the following guidance on other points of general interpretation, which is important to ensure consistency of approach.

14. **Financial Institutions** –Assessors should have a thorough understanding of the types of entities that engage in the financial activities referred to in the glossary definition of . It is important to note that such activities may be undertaken by institutions with different generic names ("bank") in different countries, and that assessors should focus on the activity, not the names attached to the institutions.

15. **VASPs and virtual assets** - Assessors should also have a thorough understanding of the financial institutions, DNFBPs and VASPs that engage in covered activities under the Glossary definition of . In particular, assessors should note that the requirements of the FATF Standards relating to virtual assets and associated providers are applied by Recommendation 15 ("New Technologies"). INR.15 explicitly confirms that the FATF Definitions of or in the Glossary include Virtual Assets Assessors should bear this in mind when assessing any Recommendations (for technical compliance) or related Immediate Outcomes (for effectiveness) using those terms.[2] See the Note to Assessors in R.15 for more detailed guidance.

16. **Evaluating the country's Assessment of risk** – Assessors are not expected to conduct an independent risk assessment of their own when assessing Recommendation1 and Immediate Outcome 1, but on the other hand should not necessarily accept a country's risk assessment as correct. In reviewing the country's risk assessment, assessors should consider the rigour of the processes and procedures employed; and the internal consistency of the assessment (whether the conclusions are reasonable given the information and analysis used). Assessors should focus on high-level issues, not fine details, and should take a common-sense approach to whether the results are reasonable. Where relevant and appropriate, assessors should also consider other credible or reliable sources of information on the country's risks, in order to identify whether there might be any material differences that should be explored further. Where the assessment team considers the country's assessment of the risks to be reasonable the risk-based elements of the Methodology could be considered on the basis of it.

17. When assessing Recommendation 1, assessors should concentrate their analysis on the following elements: (1) processes and mechanisms in place to produce and coordinate the risk

[2] The terms property, proceeds, funds, funds or other assets and/or corresponding value are used in R.3 (criteria 3.4 and 3.5), R.4 (criteria 4.1, 4.2 and 4.4), R.5 (criteria 5.2, 5.3 and 5.4), R.6 (criteria 6.5, 6.6 and 6.7), R.7 (criteria 7.2, 7.4 and 7.5), R.8 (criteria 8.1 and 8.5), R.10 (criteria 10.7), R.12 (criterion 12.1), R.20 (criterion 20.1), R.29 (criterion 29.4), R.30 (criteria 30.2, 30.3 and 30.5), R.33 (criterion 33.1), R.38 (criteria 38.1, 38.3 and 38.4) and R.40 (criterion 40.17). The words virtual assets need not appear or be explicitly included in legislation referring or defining those terms, provided that there is nothing on the face of the legislation or in case law that would preclude virtual assets from falling within the definition of these terms.

23. **Assessment for DNFBPs** – Under Recommendations 22, 23 and 28 (and specific elements of Recommendations 6 and 7), DNFBPs and the relevant supervisory (or self-regulatory) bodies are required to take certain actions. Technical compliance with these requirements should only be assessed under these specific Recommendations and should not be carried forward into other Recommendations relating to financial institutions. However, the assessment of effectiveness should take account of both financial institutions and DNFBPs when examining the relevant outcomes.

24. **Financing of Proliferation** – The requirements of the FATF Standard relating to the financing of proliferation are limited to Recommendation 7 ("Targeted Financial Sanctions"), Recommendation 15 ("New Technologies") and Recommendation 2 ("National Co-operation and Co-ordination"). In the context of the effectiveness assessment, all requirements relating to the financing of proliferation are included within Outcome 11, except those on national co-operation and co-ordination, which are included in Immediate Outcome 1. Issues relating to the financing of proliferation should be consider

consider whether the sanctions applied in practice are at ensuring future compliance by the sanctioned institution; and of non-compliance by others.

28. **International Co-operation** – In this Methodology, international co-operation is assessed in specific Recommendations and Immediate Outcomes (principally Recommendations 36-40 and Immediate Outcome 2). Assessors should also be aware of the impact that a country's ability and willingness to engage in international co-operation may have on other Recommendations and Immediate Outcomes (on the investigation of crimes with a cross-border element or the supervision of international groups), and set out clearly any instances where compliance or effectiveness is positively or negatively affected by international co-operation.

29. **Draft legislation and proposals** – Assessors should only take into account relevant laws, regulations or other AML/CFT measures that are in force and effect by the end of the on-site visit to the country. Where bills or other specific proposals to amend the system are made available to assessors, these may be referred to in the report, but should not be taken into account in the conclusions of the assessment or for ratings purposes.

30. **FATF Guidance** - assessors may also consider FATF Guidance as background information on how countries can implement specific requirements. A full list of FATF Guidance is included as an annex to this document. Such guidance may help assessors understand the practicalities of implementing the FATF Recommendations, but the application of the guidance should not form part of the assessment.

TECHNICAL COMPLIANCE

31. The technical compliance component of the Methodology refers to the implementation of the specific requirements of the FATF Recommendations, including the framework of laws and enforceable means; and the existence, powers and procedures of competent authorities. For the most part, it does not include the specific requirements of the standards that relate principally to effectiveness. These are assessed separately, through the effectiveness component of the Methodology.

32. The FATF Recommendations, being the recognised international standards, are applicable to all countries. However, assessors should be aware that the legislative, institutional and supervisory framework for AML/CFT may differ from one country to the next. Provided the FATF Recommendations are complied with, countries are entitled to implement the FATF Standards[4] in a manner consistent with their national legislative and institutional systems, even though the methods by which compliance is achieved may differ. In this regard, assessors should be aware of the risks, and the structural or contextual factors for the country.

33. The technical compliance component of the Methodology sets out the specific requirements of each Recommendation as a list of criteria, which represent those elements that should be present in order to demonstrate full compliance with the mandatory elements of the Recommendations. Criteria to be assessed are numbered sequentially for each Recommendation, but the sequence of criteria does not represent any priority or order of importance. In some cases, elaboration (indented below the criteria) is provided in order to assist in identifying important aspects of the assessment of the criteria. For criteria with such elaboration, assessors should review whether each of the elements is present, in order to judge whether the criterion as a whole is met.

COMPLIANCE RATINGS

34. For each Recommendation assessors should reach a conclusion about the extent to which a country complies (or not) with the standard. There are four possible levels of compliance: compliant, largely compliant, partially compliant, and non-compliant. In exceptional circumstances, a Recommendation may also be rated as not applicable. These ratings are based only on the criteria specified in the technical compliance assessment, and are as follows:

[4] The FATF Standards comprise the FATF Recommendations and their Interpretive Notes.

Technical compliance ratings		
Compliant	C	There are no shortcomings.
Largely compliant	LC	There are only minor shortcomings.
Partially compliant	PC	There are moderate shortcomings.
Non-compliant	NC	There are major shortcomings.
Not applicable	NA	A requirement does not apply, due to the structural, legal or institutional features of a country.
When deciding on the level of shortcomings for any Recommendation, assessors should consider, having regard to the country context, the number and the relative importance of the criteria met or not met.		

35. It is essential to note that it is the responsibility of the assessed country to demonstrate that its AML/CFT sy.9 (Cr1 (t)2.1 (,)-0.6 (t)2.4 (/)5.9)w 11.04Iia 2.827 0 Td[((r85C 0.204 0.5(is[(h)-1.322d[(0)6431.1 (

assessments for technical compliance and effectiveness, the ratings given under this Methodology will not be directly comparable with ratings given under the 2004 Methodology.

EFFECTIVENESS

39. The assessment of the effectiveness of a country's AML/CFT system is equally as important as the assessment of technical compliance with the FATF standards. Assessing effectiveness is intended to: (a) improve the FATF's focus on outcomes; (b) identify the extent to which the national AML/CFT system is achieving the objectives of the FATF standards, and identify any systemic weaknesses; and (c) enable countries to prioritise measures to improve their system. For the purposes of this Methodology, effectiveness is defined as " ".

40. In the AML/CFT context, effectiveness is the extent to which financial systems and economies mitigate the risks and threats of money laundering, and financing of terrorism and proliferation. This could be in relation to the intended result of a given (a) policy, law, or enforceable means; (b) programme of law enforcement, supervision, or intelligence activity; or (c) implementation of a specific set of measures to mitigate the money laundering and financing of terrorism risks, and combat the financing of proliferation.

41. The goal of an assessment of effectiveness is to provide an appreciation of the whole of the country's AML/CFT system and how well it works. Assessing effectiveness is based on a fundamentally different approach to assessing technical compliance with the Recommendations. It does not involve checking whether specific requirements are met, or that all elements of a given Recommendation are in place. Instead, it requires a judgement as to whether, or to what extent defined outcomes are being achieved, whether the key objectives of an AML/CFT system, in line with the FATF Standards, are being effectively met in practice The assessment process is reliant on the judgement of assessors, who will work in consultation with the assessed country.

42. It is essential to note that it is the responsibility of the assessed country to demonstrate that its AML/CFT system is effective. If the evidence is not made available, assessors can only conclude that the system is not effective.

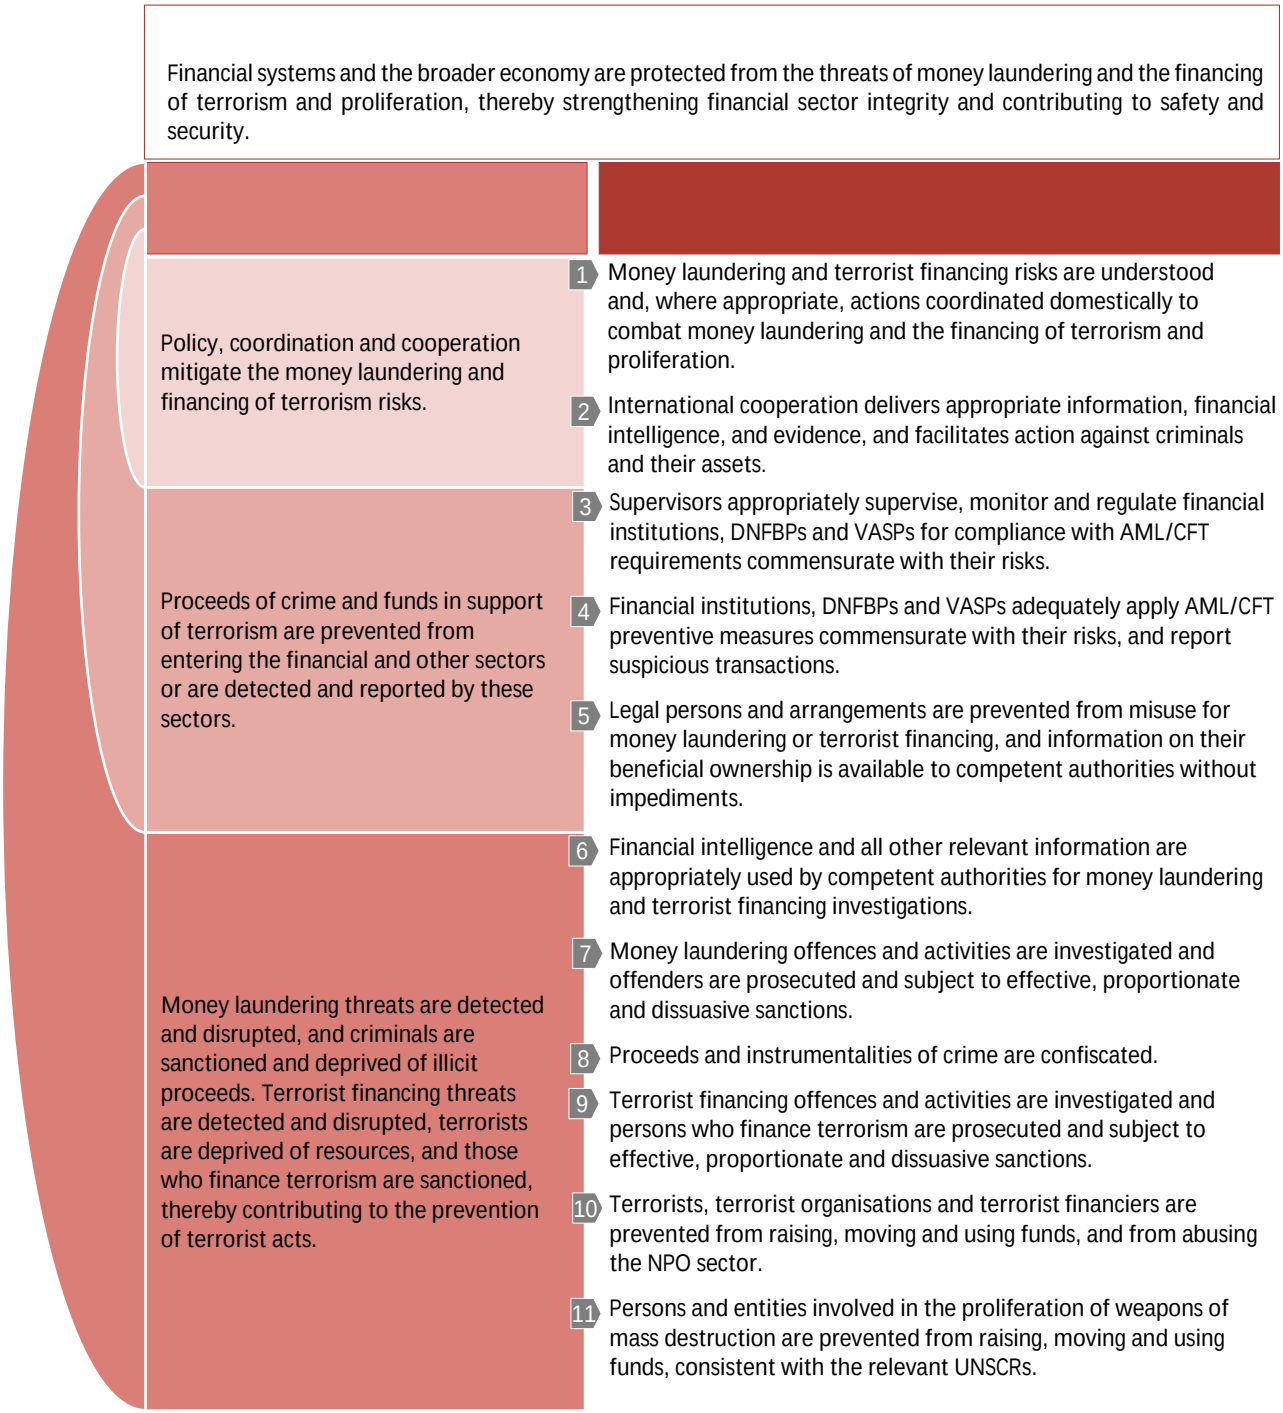
THE FRAMEWORK FOR ASSESSING EFFECTIVENESS

43. For its assessment of effectiveness, the FATF has adopted an approach focusing on a hierarchy of defined outcomes. At the highest level, the objective in implementing AML/CFT measures is that "

". In order to give the right balance between an overall understanding of the effectiveness of a country's AML/CFT system, and a detailed appreciation of how well its component parts are operating, the FATF assesses effectiveness primarily on the basis of . Each of these represents one of the key goals which an effective AML/CFT system should achieve, and they feed into three Intermediate Outcomes which represent the major thematic goals of AML/CFT measures. This approach does not seek to assess directly the effectiveness with which a country is implementing individual Recommendations; or the performance of specific organisations, or institutions. Assessors are not expected to evaluate directly the High-Level Objective

or Intermediate Outcomes, though these could be relevant when preparing the written MER and summarising the country's overall effectiveness in general terms.

44. The relation between the High-Level Objective, the Intermediate Outcomes, and the Immediate Outcomes, is set out in the diagram below:



SCOPING

45. Assessors must assess all eleven of the Immediate Outcomes. However, prior to the on-site visit, assessors should conduct a scoping exercise, in consultation with the assessed country, which should take account of the risks and other factors set out in paragraphs 5 to 10 above. Assessors should, in consultation with the assessed country, identify the higher risk issues, which should be examined in more detail in the course of the assessment and reflected in the final report. They should also seek to identify areas of lower/low risk, which may not need to be examined in the same level of detail. As the assessment continues, assessors should continue to engage the country and review their scoping based on their initial findings about effectiveness, with a view to focusing their attention on the areas where there is greatest scope to improve effectiveness in addressing the key ML/TF risks.

LINKS TO TECHNICAL COMPLIANCE

46. The country's level of technical compliance contributes to the assessment of effectiveness. Assessors should consider the level of technical compliance as part of their scoping exercise. The assessment of technical compliance reviews whether the legal and institutional foundations of an effective AML/CFT system are present. It is unlikely that a country that is assessed to have a low level of compliance with the technical aspects of the FATF Recommendations will have an effective AML/CFT system (though it cannot be taken for granted that a technically compliant country will also be effective). In many cases, the main reason for poor effectiveness will be serious deficiencies in implementing the technical elements of the Recommendations.

47. In the course of assessing effectiveness, assessors should also consider the impact of technical compliance with the relevant Recommendations when explaining why the country is (or is not) effective and making recommendations to improve effectiveness. There may in exceptional circumstances be situations in which assessors conclude that there is a low level of technical compliance but nevertheless a certain level of effectiveness (as a result of specific country circumstances, including low risks or other structural, material or contextual factors; particularities of the country's laws and institutions; or if the country applies compensatory AML/CFT measures which are not required by the FATF Recommendations). Assessors should pay particular attention to such cases in the MER, and must fully justify their decision, explaining in detail the basis and the specific reasons for their conclusions on effectiveness, despite lower levels of technical compliance.

USING THE EFFECTIVENESS METHODOLOGY

48. An assessment of effectiveness should consider each of the eleven Immediate Outcomes individually, but does not directly focus on the Intermediate or High-Level Outcomes. For each of the Immediate Outcomes, there are two overarching questions which assessors should try to answer:

- Assessors should assess whether the country is effective in relation to that outcome (whether the country is achieving the results expected of a well-performing AML/CFT system). They should base their conclusions principally on the , supported by the and the

; and taking into account the level of technical compliance, and contextual factors.

- Assessors should understand the reasons why the country may not have reached a high level of effectiveness and, where possible, make recommendations to improve its ability to achieve the specific outcome. They should base their analysis and recommendations on their consideration of the and on the , including activities, processes, resources and infrastructure. They should also consider the effect of technical deficiencies on effectiveness, and the relevance of contextual factors. If assessors are satisfied that the outcome is being achieved to a high degree, they would not need to consider in detail (though there may still be value in identifying good practises or potential further improvements, or ongoing efforts needed to sustain a high level of effectiveness).

49. The boxed text at the top of each of the Immediate Outcomes describes the main features and outcomes of an effective system. This sets out the situation in which a country is effective at achieving the outcome, and provides the benchmark for the assessment.

50. The second section sets out the basis for assessors to judge if, and to what extent, the outcome is being achieved. The are the mandatory questions which assessors should seek to answer, in order to get an overview about how effective a country is under each outcome. Assessors' conclusions about how effective a country is should be based on an overview of each outcome, informed by the assessment of the .

51. Assessors should examine all the listed for each outcome. However, they may vary the degree of detail with which they examine each in order to reflect the degree of risk and materiality associated with that issue in the country. In exceptional circumstances, assessors may also consider additional issues which they consider, in the specific circumstances, to be core to the effectiveness outcome (alternative measures which reflect the specificities of the country's AML/CFT system, but which are not included in the or as additional or). They should make clear when, and why, any additional issues have been used which are considered to be core.

52. The sets out the types and sources of information which are most relevant to understanding the extent to which the outcome is achieved, including particular data points which assessors might look for when assessing the . The supporting information and

other data can test or validate assessors' understanding of the core issues, and can provide a quantitative element to complete the assessors' picture of how well the outcome is achieved.

53. The supporting information and data listed are not exhaustive and not mandatory. The data, statistics, and other material which are available will vary considerably from country to country, and assessors should make use of whatever information the country can provide in order to assist in reaching their judgement.

54. Assessment of effectiveness is not a statistical exercise. Assessors should use data and statistics, as well as other qualitative information, when reaching an informed judgement about how well the outcome is being achieved, but should interpret the available data critically, in the context of the country's circumstances. The focus should not be on raw data (which can be interpreted in a wide variety of ways and even with contradictory conclusions), but on information and analysis which indicates, in the context of the country being assessed, whether the objective is achieved. Assessors should be particularly cautious about using data relating to other countries as a comparison point in judging effectiveness, given the significant differences in country circumstances, AML/CFT systems, and data collection practices. Assessors should also be aware that a high level of outputs does not always contribute positively towards achieving the desired outcome.

55. The section of the Methodology sets out examples of the elements which are normally involved in delivering each outcome. These are not an exhaustive list of the possible factors, but are provided as an aid to assessors when considering the reasons why a country may (or may not) be achieving a particular outcome (through a breakdown in one of the factors). In most cases, assessors will need to refer to the in order to reach a firm conclusion about the extent to which a particular outcome is being achieved. It should be noted that the activities and processes listed in this section do not imply a single mandatory model for organising AML/CFT functions, but only represent the most commonly implemented administrative arrangements, and that the reasons why a country may not be effective are not limited to the factors listed. It should be noted that assessors need to focus on the qualitative aspects of these , not on the mere underlying process or procedure.

56. Assessors are not required to review all the in every case. When a country is demonstrably effective in an area, assessors should set out succinctly why this is the case, and highlight any areas of particular good practice, but they do not need to examine every individual factor in this section of the Methodology. There may also be cases in which a country is demonstrably not effective and where the reasons for this are fundamental (where there are major technical deficiencies). In such cases, there is also no need for assessors to undertake further detailed examination of why the outcome is not being achieved.

57. Assessors should be aware of outcomes which depend on a sequence of different steps, or a to achieve the outcome (Immediate Outcome 7, which includes investigation, prosecution and sanctioning, in order). In these cases, it is possible that an outcome may not be achieved because of a failure at one stage of the process, even though the other stages are themselves effective.

58. Assessors should also consider contextual factors, which may influence the issues assessors consider to be material or higher risk, and consequently, where they focus their attention. These

63. .
Assessors should set out clearly the extent to which they consider the outcome to be achieved overall, noting any variation, such as particular areas where effectiveness is higher or lower. They should also clearly explain the basis for their judgement, problems or weaknesses which they believe are responsible for a lack of effectiveness; the and the information which they considered to be most significant; the way in which they understood data and other indicators; and the weight they gave to different aspects of the assessment. Assessors should also identify any areas of particular strength or examples of good practice.

64. In order to ensure clear and comparable decisions, assessors should also summarise their conclusion in the form of a rating. For each Immediate Outcome there are four possible ratings for effectiveness, based on the extent to which the and are addressed:

These ratings should be decided on the basis of the following:

Effectiveness ratings	
High level of effectiveness	The Immediate Outcome is achieved to a very large extent. Minor improvements needed.
Substantial level of effectiveness	The Immediate Outcome is achieved to a large extent. Moderate improvements needed.
Moderate level of effectiveness	The Immediate Outcome is achieved to some extent. Major improvements needed.
Low level of effectiveness	The Immediate Outcome is not achieved or achieved to a negligible extent. Fundamental improvements needed.

RECOMMENDATIONS ON HOW TO IMPROVE THE AML/CFT SYSTEM

65. Assessors' recommendations to a country are a vitally important part of the evaluation. On the basis of their conclusions, assessors should make recommendations of measures that the country should take in order to improve its AML/CFT system, including both the level of effectiveness and the level of technical compliance. The report should prioritise these recommendations for remedial measures, taking into account the country's circumstances and capacity, its level of effectiveness, and any weaknesses and problems identified. Assessors' recommendations should not simply be to address each of the deficiencies or weaknesses identified, but should add value by identifying and prioritising specific measures in order to most effectively mitigate the risks the country faces. This could be on the basis that they offer the greatest and most rapid practical improvements, have the

66. Assessors should be careful to consider the circumstances and context of the country, and its legal and institutional system when making recommendations, noting that there are several different ways to achieve an effective AML/CFT system, and that their own preferred model may not be appropriate in the context of the country assessed.

67. In order to facilitate the development of an action plan by the assessed country, assessors should clearly indicate in their recommendations where a specific action is required, and where there may be some flexibility about how a given priority objective is to be achieved. Assessors should avoid making unnecessarily rigid recommendations (on the scheduling of certain measures), so as not to hinder countries efforts to fully adapt the recommendations to fit local circumstances.

68. Even if a country has a high level of effectiveness, this does not imply that there is no further room for improvement. There may also be a need for action in order to sustain a high level of effectiveness in the face of evolving risks. If assessors are able to identify further actions in areas where there is a high degree of effectiveness, then they should also include these in their recommendations.

POINT OF REFERENCE

69. If assessors have any doubts about how to apply this Methodology, or about the interpretation of the FATF Standards, they should consult the FATF Secretariat or the Secretariat of their FSRB.

TECHNICAL COMPLIANCE ASSESSMENT

RECOMMENDATION 1 ASSESSING RISKS AND APPLYING A RISK-BASED APPROACH[5]

OBLIGATIONS AND DECISIONS FOR COUNTRIES

1.1 Countries[6] should identify and assess the ML/TF risks for the country,

1.2 Countries should designate an authority or mechanism to co-ordinate actions to assess risks.

1.3 Countries should keep the risk assessments up-to-date.

1.4 Countries should have mechanisms to provide information on the results of the risk assessment(s) to all relevant competent authorities and self-regulatory bodies (SRBs), financial institutions and DNFBPs.

1.5 Based on their understanding of their risks, countries should apply a risk-based approach to allocating resources and implementing measures to prevent or mitigate ML/TF.

1.6 Countries which decide not to apply some of the FATF Recommendations requiring financial institutions or DNFBPs to take certain actions, should demonstrate that:

(a) there is a proven low risk of ML/TF; the exemption occurs in strictly limited and justified circumstances; and it relates to a particular type of financial institution or activity, or DNFBP; or

(b) a financial activity (other than the transferring of money or value) is carried out by a natural or legal person on an occasional or very limited basis (having regard to quantitative and absolute criteria), such that there is a low risk of ML/TF.

---

5 The requirements in this recommendation should be assessed taking into account the more specific risk based requirements in other Recommendations. Under Recommendation 1 assessors should come to an overall view of risk assessment and risk mitigation by countries and financial institutions/DNFBPs as required in other Recommendations, but should not duplicate the detailed assessments of risk-based measures required under other Recommendations. Assessors are not expected to conduct an in-depth review of the country's assessment(s) of risks. Assessors should focus on the process, mechanism, and information sources adopted by the country, as well as the contextual factors, and should consider the reasonableness of the conclusions of the country's assessment(s) of risks.

6 Where appropriate, ML/TF risk assessments at a supra-national level should be taken into account when considering whether this obligation is satisfied.

1.7 Where countries identify higher risks, they should ensure that their AML/CFT regime addresses such risks, including through: (a) requiring financial institutions and DNFBPs to take enhanced measures to manage and mitigate the risks; or (b) requiring financial institutions and DNFBPs to ensure that this information is incorporated into their risk assessments.

1.8 Countries may allow simplified measures for some of the FATF Recommendations requiring financial institutions or DNFBPs to take certain actions, provided that a lower risk has been identified, and this is consistent with the country's assessment of its ML/TF risks[7].

1.9 Supervisors and SRBs should ensure that financial institutions and DNFBPs areed( )TjEMC

(c) take enhanced measures to manage and mitigate the risks where higher risks are identified.

1.12 Countries may only permit financial institutions and DNFBPs to take simplified measures to manage and mitigate risks, if lower risks have been identified, and criteria 1.9 to 1.11 are met. Simplified measures should not be permitted whenever there is a suspicion of ML/TF.

RECOMMENDATION 2 NATIONAL CO-OPERATION AND CO-ORDINATION

2.1 Countries should have national AML/CFT policies which are informed by the risks identified, and are regularly reviewed.

2.2 Countries should designate an authority or have a co-ordination or other mechanism that is responsible for national AML/CFT policies.

2.3 Mechanisms should be in place to enable policy makers, the Financial Intelligence Unit (FIU), law enforcement authorities, supervisors and other relevant competent authorities to co-operate, and where appropriate, co-ordinate and exchange information domestically with each other concerning the development and implementation of AML/CFT policies and activities. Such mechanisms should apply at both policymaking and operational levels.

2.4 Competent authorities should have similar co-operation and, where appropriate, co-ordination mechanisms to combat the financing of proliferation of weapons of mass destruction.

2.5 Countries should have cooperation and coordination between relevant authorities to ensure the compatibility of AML/CFT requirements with Data Protection and Privacy rules and other similar provisions (e.g. data security/localisation).[10]

[10] For purposes of technical compliance, the assessment should be limited to whether there is co-operation and, where appropriate, co-ordination, whether formal or informal, between the relevant authorities.

RECOMMENDATION 3 MONEY LAUNDERING OFFENCE

3.1 ML should be criminalised on the basis of the Vienna Convention and the Palermo Convention (see Article 3(1)(b)&(c) Vienna Convention and Article 6(1) Palermo Convention)[11].

3.2 The predicate offences for ML should cover all serious offences, with a view to including the widest range of predicate offences. At a minimum, predicate offences should include a range of offences in each of the designated categories of offences[12].

3.3 Where countries apply a threshold approach or a combined approach that includes a threshold approach[13], predicate offences should, at a minimum, comprise all offences that:

(a) fall within the category of serious offences under their national law; or

(b) are punishable by a maximum penalty of more than one year's imprisonment; or

(c) are punished by a minimum penalty of more than six months' imprisonment (for countries that have a minimum threshold for offences in their legal system).

3.4 The ML offence should extend to any type of property, regardless of its value, that directly or indirectly represents the proceeds of crime.

3.5 When proving that property is the proceeds of crime, it should not be necessary that a person be convicted of a predicate offence.

3.6 Predicate offences for money laundering should extend to conduct that occurred in another country, which constitutes an offence in that country, and which would have constituted a predicate offence had it occurred domestically.

3.7 The ML offence should apply to persons who commit the predicate offence, unless this is contrary to fundamental principles of domestic law.

3.8 It should be possible for the intent and knowledge required to prove the ML offence to be inferred from objective factual circumstances.

3.9 Proportionate and dissuasive criminal sanctions should apply to natural persons convicted of ML.

---

11 Note in particular the physical and material elements of the offence.

12 Recommendation 3 does not require countries to create a separate offence of "participation in an organised criminal group and racketeering". In order to cover this category of "designated offence", it is sufficient if a country meets either of the two options set out in the Palermo Convention, either a separate offence or an offence based on conspiracy.

13 Countries determine the underlying predicate offences for ML by reference to (a) all offences; or (b) to a threshold linked either to a category of serious offences or to the penalty of imprisonment applicable to the predicate offence (threshold approach); or (c) to a list of predicate offences; or (d) a combination of these approaches.

3.10 Criminal liability and sanctions, and, where that is not possible (due to fundamental principles of domestic law), civil or administrative liability and sanctions, should apply to legal persons. This should not preclude parallel criminal, civil or administrative proceedings with respect to legal persons in countries in which more than one form of liability is available. Such measures are without prejudice to the criminal liability of natural persons. All sanctions should be proportionate and dissuasive.

3.11 Unless it is not permitted by fundamental principles of domestic law, there should be appropriate ancillary offences to the ML offence, including: participation in; association with or conspiracy to commit; attempt; aiding and abetting; facilitating; and counselling the commission.

RECOMMENDATION 4 CONFISCATION AND PROVISIONAL MEASURES

4.1 Countries should have measures, including legislative measures, that enable the confiscation of the following, whether held by criminal defendants or by third parties:

(a) property laundered;

(b) proceeds of (including income or other benefits derived from such proceeds), or instrumentalities used or intended for use in, ML or predicate offences;

(c) property that is the proceeds of, or used in, or intended or allocated for use in the financing of terrorism, terrorist acts or terrorist organisations; or

(d) property of corresponding value.

4.2 Countries should have measures, including legislative measures, that enable their competent authorities to:

(a) identify, trace and evaluate property that is subject to confiscation;

(b) carry out provisional measures, such as freezing or seizing, to prevent any dealing, transfer or disposal of property subject to confiscation[14];

(c) take steps that will prevent or void actions that prejudice the country's ability to freeze or seize or recover property that is subject to confiscation; and

(d) take any appropriate investigative measures.

4.3 Laws and other measures should provide protection for the rights of third parties.

4.4 Countries should have mechanisms for managing and, when necessary, disposing of property frozen, seized or confiscated.

[14] Measures should allow the initial application to freeze or seize property subject to confiscation to be made or without prior notice, unless this is inconsistent with fundamental principles of domestic law.

RECOMMENDATION 5 TERRORIST FINANCING OFFENCE

5.1 Countries should criminalise TF on the basis of the Terrorist Financing Convention[15].

5.2 TF offences should extend to any person who wilfully provides or collects funds or other assets by any means, directly or indirectly, with the unlawful intention that they should be used, or in the knowledge that they are to be used, in full or in part: (a) to carry out a terrorist act(s); or (b) by a terrorist organisation or by an individual terrorist (even in the absence of a link to a specific terrorist act or acts).[16]

RECOMMENDATION 6 TARGETED FINANCIAL SANCTIONS RELATED TO TERRORISM AND TERRORIST FINANCING

6.1 In relation to designations pursuant to United Nations Security Council 1267/1989 (Al Qaida) and 1988 sanctions regimes (Referred to below as "UN Sanctions Regimes"), countries should:

(a) identify a competent authority or a court as having responsibility for proposing persons or entities to the 1267/1989 Committee for designation; and for proposing persons or entities to the 1988 Committee for designation;

(b) have a mechanism(s) for identifying targets for designation, based on the designation criteria set out in the relevant United Nations Security Council resolutions (UNSCRs);

(c) apply an evidentiary standard of proof of "reasonable grounds" or "reasonable basis" when deciding whether or not to make a proposal for designation. Such proposals for designations should not be conditional upon the existence of a criminal proceeding;

(d) follow the procedures and (in the case of UN Sanctions Regimes) standard forms for listing, as adopted by the relevant committee (the 1267/1989 Committee or 1988 Committee); and

(e) provide as much relevant information as possible on the proposed name[18]; a statement of case[19] which contains as much detail as possible on the basis for the listing[20]; and (in the case of proposing names to the 1267/1989 Committee), specify whether their status as a designating state may be made known.

6.2 In relation to designations pursuant to UNSCR 1373, countries should:

(a) identify a competent authority or a court as having responsibility for designating persons or entities that meet the specific criteria for designation, as set forth in UNSCR 1373; as put forward either on the country's own motion or, after examining and giving effect to, if appropriate, the request of another country.

---

18 In particular, sufficient identifying information to allow for the accurate and positive identification of individuals, groups, undertakings, and entities, and to the extent possible, the information required by Interpol to issue a Special Notice

19 This statement of case should be releasable, upon request, except for the parts a Member State identifies as being confidential to the relevant committee (the 1267/1989 Committee or 1988 Committee).

20 Including: specific information supporting a determination that the person or entity meets the relevant designation; the nature of the information; supporting information or documents that can be provided; and details of any connection between the proposed designee and any currently designated person or entity

(b) have a mechanism(s) for identifying targets for designation, based on the designation criteria set out in UNSCR 1373[21];

(c) when receiving a request, make a prompt determination of whether they are satisfied, according to applicable (supra-) national principles that the request is supported by reasonable grounds, or a reasonable basis, to suspect or believe that the proposed designee meets the criteria for designation in UNSCR 1373;

(d) apply an evidentiary standard of proof of "reasonable grounds" or "reasonable basis" when deciding whether or not to make a designation[22]. Such (proposals for) designations should not be conditional upon the existence of a criminal proceeding; and

(e) when requesting another country to give effect to the actions initiated under the freezing mechanisms, provide as much identifying information, and specific information supporting the designation, as possible.

6.3 The competent authority(ies) should have legal authorities and procedures or mechanisms to:

(a) collect or solicit information to identify persons and entities that, based on reasonable grounds, or a reasonable basis to suspect or believe, meet the criteria for designation; and

(b) operate against a person or entity who has been identified and whose (proposal for) designation is being considered.

6.4 Countries should implement targeted financial sanctions without delay[23].

6.5 Countries should have the legal authority and identify domestic competent authorities responsible for implementing and enforcing targeted financial sanctions, in accordance with the following standards and procedures:

(a) Countries should require all natural and legal persons within the country to freeze, without delay and without prior notice, the funds or other assets of designated persons and entities.

(b) The obligation to freeze should extend to: (i) all funds or other assets that are owned or controlled by the designated person or entity, and not just those that can be tied to a particular terrorist act, plot or threat; (ii) those funds or other assets that are wholly or jointly owned or controlled, directly or indirectly, by designated persons or entities; and (iii) the funds or other assets derived or generated from funds or other assets owned or controlled directly or indirectly by designated persons or entities, as well as (iv) funds or other assets of persons and entities acting on behalf of, or at the direction of, designated persons or entities.

(c) Countries should prohibit their nationals, or[24] any persons and entities within their jurisdiction, from making any funds or other assets, economic resources, or financial or other related services, available, directly or indirectly, wholly or jointly, for the benefit of designated persons and entities; entities owned or controlled, directly or indirectly, by designated persons or entities; and persons and entities acting on behalf of, or at the direction of, designated persons or entities, unless licensed, authorised or otherwise notified in accordance with the relevant UNSCRs.

(d) Countries should have mechanisms for communicating designations to the financial sector and the DNFBPs immediately upon taking such action, and providing clear guidance to financial institutions and other persons or entities, including DNFBPs, that may be holding targeted funds or other assets, on their obligations in taking action under freezing mechanisms.

(e) Countries should require financial institutions and DNFBPs to report to competent authorities any assets frozen or actions taken in compliance with the prohibition requirements of the relevant UNSCRs, including attempted transactions.

(f) Countries should adopt measures which protect the rights of third parties acting in good faith when implementing the obligations under Recommendation 6.

6.6 Countries should have publicly known procedures to de-list and unfreeze the funds or other assets of persons and entities which do not, or no longer, meet the criteria for designation. These should include:

(a) procedures to submit de-listing requests to the relevant UN sanctions Committee in the case of persons and entities designated pursuant to the UN Sanctions Regimes , in the view of the country, do not or no longer meet the criteria for designation. Such

[24] "or", in this particular case means that countries must both prohibit their own nationals and prohibit any persons/entities in their jurisdiction.

procedures and criteria should be in accordance with procedures adopted by the or the , as appropriate[25];

(b)

lt15.7 (e)-T/A(g)-6 ()-1.4 ( )-0..6 (b)7 (r)2 8 0 Aä̀Wá v1®v1!d1Qri)e%a>ÈÈlg7:srÑ1á.jQÀBrliP:†Câ̊Vv1BB&bé

that may be holding targeted funds or other assets, on their obligations in taking action under freezing mechanisms.

(e) Countries should require financial institutions and DNFBPs to report to competent authorities any assets frozen or actions taken in compliance with the prohibition requirements of the relevant UNSCRs, including attempted transactions.

(f) Countries should adopt measures which protect the rights of third parties acting in good faith when implementing the obligations under Recommendation 7.

7.3 Countries should adopt measures for monitoring and ensuring compliance by financial institutions and DNFBPs with the relevant laws or enforceable means governing the obligations under Recommendation 7. Failure to comply with such laws or enforceable means should be subject to civil, administrative or criminal sanctions.

7.4 Countries should develop and implement publicly known procedures to submit de-listing requests to the Security Council in the case of designated persons and entities that, in the view of the country, do not or no longer meet the criteria for designation[27]. These should include:

(a) enabling listed persons and entities to petition a request for de-listing at the Focal Point for de-listing established pursuant to UNSCR 1730, or informing designated persons or entities to petition the Focal Point directly;

(b) publicly known procedures to unfreeze the funds or other assets of persons or entities with the same or similar name as designated persons or entities, who are inadvertently affected by a freezing mechanism (a false positive), upon verification that the person or entity involved is not a designated person or entity;

(c) authorising access to funds or other assets, where countries have determined that the exemption conditions set out in UNSCRs 1718 and 2231 are met, in accordance with the procedures set out in those resolutions; and

(d) mechanisms for communicating de-listings and unfreezings to the financial sector and the DNFBPs immediately upon taking such action, and providing guidance to financial institutions and other persons or entities, including DNFBPs, that may be holding targeted funds or other assets, on their obligations to respect a de-listing or unfreezing action.

7.5 With regard to contracts, agreements or obligations that arose prior to the date on which accounts became subject to targeted financial sanctions:

(a) countries should permit the addition to the accounts frozen pursuant to UNSCRs 1718 or 2231 of interests or other earnings due on those accounts or payments due under contracts, agreements or obligations that arose prior to the date on which

[27] In the case of UNSCR 1718 and its successor resolutions, such procedures and criteria should be in accordance with any applicable guidelines or procedures adopted by the United Nations Security Council pursuant to UNSCR 1730 (2006) and any successor resolutions, including those of the Focal Point mechanism established under that resolution.

RECOMMENDATION 8	NON-PROFIT ORGANISATIONS (NPOS)

(d) encourage NPOs to conduct transactions via regulated financial channels, wherever feasible, keeping in mind the varying capacities of financial sectors in different countries and in different areas of urgent charitable and humanitarian concerns.

8.3 Countries should take steps to promote effective supervision or monitoring such that they are able to demonstrate that risk based measures apply to NPOs at risk of terrorist financing abuse.[30]

8.4 Appropriate authorities should:

(a) monitor the compliance of NPOs with the requirements of this Recommendation, including the risk-based measures being applied to them under criterion 8.3[31]; and

(b) be able to apply effective, proportionate and dissuasive sanctions for violations by NPOs or persons acting on behalf of these NPOs.[32]

8.5 Countries should:

(a) ensure effective co-operation, co-ordination and information-sharing to the extent possible among all levels of appropriate authorities or organisations that hold relevant information on NPOs;

(b) have investigative expertise and capability to examine those NPOs suspected of either being exploited by, or actively supporting, terrorist activity or terrorist organisations;

(c) ensure that full access to information on the administration and management of particular NPOs (including financial and programmatic information) may be obtained during the course of an investigation; and

(d) establish appropriate mechanisms to ensure that, when there is suspicion or reasonable grounds to suspect th

RECOMMENDATION 9 FINANCIAL INSTITUTION SECRECY LAWS

9.1 Financial institution secrecy laws should not inhibit the implementation of the FATF Recommendations[33].

[33] Areas where this may be of particular concern are the ability of competent authorities to access information they require to properly perform their functions in combating ML or FT; the sharing of information between competent authorities, either domestically or internationally; and the sharing of information between financial institutions where this is required by Recommendations 13, 16 or 17.

RECOMMENDATION 10 CUSTOMER DUE DILIGENCE[34] (CDD)

10.1 Financial institutions should be prohibited from keeping anonymous accounts or accounts in obviously fictitious names.

10.2

10.7 Financial institutions should be required to conduct ongoing due diligence on the business relationship, including:

(a) scrutinising transactions undertaken throughout the course of that relationship to ensure that the transactions being conducted are consistent with the financial institution's knowledge of the customer, their business and risk profile, including where necessary, the source of funds; and

(b) ensuring that documents, data or information collected under the CDD process is kept up-to-date and relevant, by undertaking reviews of existing records, particularly for higher risk categories of customers.

10.8 For customers that are legal persons or legal arrangements, the financial institution should be required to understand the nature of the customer's business and its ownership and control structure.

10.9 For customers that are legal persons or legal arrangements, the financial institution should be required to identify the customer and verify its identity through the following information:

(a) name, legal form and proof of existence;

(b) the powers that regulate and bind the legal person or arrangement, as well as the names of the relevant persons having a senior management position in the legal person or arrangement; and

(c) the address of the registered office and, if different, a principal place of business.

10.10 For customers that are legal persons[35], the financial institution should be required to identify and take reasonable measures to verify the identity of beneficial owners through the following information:

(a) the identity of the natural person(s) (if any[36]) who ultimately has a controlling ownership interest[37] in a legal person; and

(b) to the extent that there is doubt under (a) as to whether the person(s) with the controlling ownership interest is the beneficial owner(s) or where no natural person

35 Where the customer or the owner of the controlling interest is a company listed on a stock exchange and subject to disclosure requirements (either by stock exchange rules or through law or enforceable means) which impose requirements to ensure adequate transparency of beneficial ownership, or is a majority-

10.14 Financial institutions should be required to verify the identity of the customer and beneficial owner before or during the course of establishing a business relationship or conducting transactions for occasional customers; or (if permitted) may complete verification after the establishment of the business relationship, provided that:

(a) this occurs as soon as reasonably practicable;

(b) this is essential not to interrupt the normal conduct of business; and

(c) the ML/TF risks are effectively managed.

10.15 Financial institutions should be required to adopt risk management procedures concerning the conditions under which a customer may utilise the business relationship prior to verification.

10.16 Financial ins intions shic ast( )10.5(t)6 (o(u)2.7 (b)8.5)3.9 (l)485 (u)26.5 (ct)6.1il th

10.20 In cases where financial institutions form a suspicion of money laundering or terrorist financing, and they reasonably believe that performing the CDD process will tip-off the customer, they should be permitted not to pursue the CDD process, and instead should be required to file an STR.

RECOMMENDATION 11 RECORD KEEPING[40]

11.1 Financial institutions should be required to maintain all necessary records on transactions, both domestic and international, for at least five years following completion of the transaction.

11.2 Financial institutions should be required to keep all records obtained through CDD measures, account files and business correspondence, and results of any analysis undertaken, for at least five years following the termination of the business relationship or after the date of the occasional transaction.

11.3 Transaction records should be sufficient to permit reconstruction of individual transactions so as to provide, if necessary, evidence for prosecution of criminal activity.

11.4 Financial institutions should be required to ensure that all CDD information and transaction records are available swiftly to domestic competent authorities upon appropriate authority.

40 The principle that financial institutions should maintain records on transactions and information obtained through CDD measures should be set out in law.

RECOMMENDATION 12 POLITICALLY EXPOSED PERSONS (PEPS)

12.1 In relation to foreign PEPs, in addition to performing the CDD measures required under Recommendation 10, financial institutions should be required to:

(a) put in place risk management systems to determine whether a customer or the beneficial owner is a PEP;

(b) obtain senior management approval before establishing (or continuing, for existing customers) such business relationships;

(c) take reasonable measures to establish the source of wealth and the source of funds of customers and beneficial owners identified as PEPs; and

(d) conduct enhanced ongoing monitoring on that relationship.

12.2 In relation to domestic PEPs or persons who have been entrusted with a prominent function by an international organisation, in addition to performing the CDD measures required under Recommendation10, financial institutions should be required to:

(a) take reasonable measures to determine whether a customer or the beneficial owner is such a person; and

(b) in cases when there is higher risk business relationship with such a person, adopt the measures in criterion 12.1 (b) to (d).

12.3 Financial institutions should be required to apply the relevant requirements of criteria 12.1 and 12.2 to family members or close associates of all types of PEP.

12.4 In relation to life insurance policies, financial institutions should be required to take reasonable measures to determine whether the beneficiaries and/or, where required, the beneficial owner of the beneficiary, are PEPs. This should occur, at the latest, at the time of the payout. Where higher risks are identified, financial institutions should be required to inform senior management before the payout of the policy proceeds, to conduct enhanced scrutiny on the whole business relationship with the policyholder, and to consider making a suspicious transaction report.

RECOMMENDATION 13 CORRESPONDENT BANKING

13.1 In relation to cross-border correspondent banking and other similar relationships, financial institutions should be required to:

(a) gather sufficient information about a respondent institution to understand fully the nature of the respondent's business, and to determine from publicly available information the reputation of the institution and the quality of supervision, including whether it has been subject to a ML/TF investigation or regulatory action;

(b) assess the respondent institution's AML/CFT controls;

(c) obtain approval from senior management before establishing new correspondent relationships; and

(d) clearly understand the respective AML/CFT responsibilities of each institution.

13.2 With respect to "payable-through accounts", financial institutions should be required to satisfy themselves that the respondent bank:

(a) has performed CDD obligations on its customers that have direct access to the accounts of the correspondent bank; and

(b) is able to provide relevant CDD information upon request to the correspondent bank.

13.3 Financial institutions should be prohibited from entering into, or continuing, correspondent banking relationships with shell banks. They should be required to satisfy themselves that respondent financial institutions do not permit their accounts to be used by shell banks.

RECOMMENDATION 14 MONEY OR VALUE TRANSFER SERVICES (MVTS)

14.1 Natural or legal persons that provide MVTS (MVTS providers) should be required to be licensed or registered[41].

14.2. Countries should take action, with a view to identifying natural or legal persons that carry out MVTS without a licence or registration, and applying proportionate and dissuasive sanctions to them.

14.3 MVTS providers should be subject to monitoring for AML/CFT compliance.

14.4 Agents for MVTS providers should be required to be licensed or registered by a competent authority, or the MVTS provider should be required to maintain a current list of its agents accessible by competent authorities in the countries in which the MVTS provider and its agents operate.

14.5 MVTS providers that use agents should be required to include them in their AML/CFT programmes and monitor them for compliance with these programmes.

[41] Countries need not impose a separate licensing or registration system with respect to licensed or registered financial institutions which are authorised to perform MVTS.

RECOMMENDATION 15 NEW TECHNOLOGIES

:

For the purposes of applying the FATF Recommendations, countries should consider virtual assets as "property", "proceeds", "funds", "funds or other assets", or other "corresponding value". When assessing any Recommendation(s) using these terms[42], the words virtual assets do not have to appear or be explicitly included in legislation referring to or defining those terms.

Assessors should satisfy themselves that the country has demonstrated that nothing in the text of the legislation or in case law precludes virtual assets from falling within the definition of these terms. Where these terms do not cover virtual assets, the deficiency should be noted in the relevant Recommendation(s) that use the term.

Assessors should also satisfy themselves that VASPs may be considered as existing sources of information on beneficial ownership for the purposes of c.24.6(c)(i) and 25.5; and are empowered to obtain relevant information from trustees for the purposes of c.25.3 and 25.4

Paragraph 1 of INR.15 also requires countries to apply the relevant measures under the FATF Recommendations to virtual assets and virtual asset service providers (VASPs):

a) Where these are preventive measures under Recommendations 10 to 21 and implementation of TFS in R.6 (sub-criteria 6.5(d) and (e), and 6.6(g)) and R.7 (sub-criteria 7.2(d) and (e), criterion 7.3, and sub-criterion 7.4(d)), their application to VASPs should be assessed under Recommendation 15, as should compliance with relevant aspects of R.1, 26,Fy8 (F)5.4 4.6

New technologies

15.1 Countries and financial institutions should identify and assess the ML/TF risks that may arise in relation to the development of new products and new business practices, including new delivery mechanisms, and the use of new or developing technologies for both new and pre-existing products.

15.2 Financial institutions should be required to:

(a) undertake the risk assessments prior to the launch or use of such products, practices and technologies; and

(b) take appropriate measures to manage and mitigate the risks.

Virtual assets and virtual asset service providers[44]

15.3 In accordance with Recommendation 1, countries should:

(a) identify and assess the money laundering and terrorist financing risks emerging from virtual asset activities and the activities or operations of VASPs;

(b) based on their understanding of their risks, apply a risk-based approach to ensure that measures to prevent or mitigate money laundering and terrorist financing are commensurate with the risks identified; and

(c) require VASPs to take appropriate steps to identify, assess, manage and mitigate their money laundering and terrorist financing risks, as required by criteria 1.10 and 1.11.

15.4 Countries should ensure that:

(a) VASPs are required to be licensed or registered[45] at a minimum[46]:

(i) when the VASP is a legal person, in the jurisdiction(s) where it is created[47]; and

---

44 Note to assessors: Countries that have decided to prohibit virtual assets should only be assessed under criteria 15.1, 15.2, 15.3(a) and 15.3(b), 15.5 and 15.11, as the remaining criteria are not applicable in such cases.

45 A country need not impose a separate licensing or registration system with respect to natural or legal persons already licensed or registered as financial institutions (as defined by the FATF Recommendations) within that country, which, under such license or registration, are permitted to perform VASP activities and which are already subject to the full range of applicable obligations under the FATF Recommendations.

46 Jurisdictions may also require VASPs that offer products and/or services to customers in, or conduct operations from, their jurisdiction to be licensed or registered in this jurisdiction.

47 References to creating a legal person include incorporation of companies or any other mechanism that is used. To clarify, the requirement in criterion 15.4(a)(i) is that a country must ensure that a VASP created within the country is licenced or registered, but not that any VASP licenced or registered in the country is also registered in any third country where it was created.

(ii) when the VASP is a natural person, in the jurisdiction where its place of business is located[48]; and

(b) competent authorities take the necessary legal or regulatory measures to prevent criminals or their associates from holding, or being the beneficial owner of, a significant or controlling interest, or holding a management function in, a VASP.

15.5 Countries should take action to identify natural or legal persons that carry out VASP activities without the requisite license or registration, and apply appropriate sanctions to them.[49]

15.6 Consistent with the applicable provisions of Recommendations 26 and 27, countries should ensure that:

(a) VASPs are subject to adequate regulation and risk-based supervision or monitoring by a competent authority[50], including systems for ensuring their compliance with national AML/CFT requirements;

(b) supervisors have adequate powers to supervise or monitor and ensure compliance by VASPs with requirements to combat money laundering and terrorist financing, including the authority to conduct inspections, compel the production of information and impose a range of disciplinary and financial sanctions, including the power to withdraw, restrict or suspend the VASP's license or registration, where applicable.

15.7 In line with Recommendation 34, competent authorities and supervisors should establish guidelines, and provide feedback, which will assist VASPs in applying national measures to combat money laundering and terrorist financing, and, in particular, in detecting and reporting suspicious transactions.

15.8 In line with Recommendation 35, countries should ensure that:

(a) there is a range of proportionate and dissuasivt 4rtnce(r)1.9 (326 0 7 0 Td[(-3.6 (c).7 (4)1m).6 (l

15.9 With respect to the preventive measures, VASPs should be required to comply with the requirements set out in Recommendations 10 to 21, subject to the following qualifications:

(a) R.10 – The occasional transactions designated threshold above which VASPs are required to conduct CDD is USD/EUR 1 000.

(b) R.16 – For virtual asset transfers[51]ea

RECOMMENDATION 16 WIRE TRANSFERS

16.1 Financial institutions should be required to ensure that all cross-border wire transfers of USD/EUR 1 000 or more are always accompanied by the following:

(a) Required and accurate[56] originator information:

(i) the name of the originator;

(ii) the originator account number where such an account is used to process the transaction or, in the absence of an account, a unique transaction reference number which permits traceability of the transaction; and

(iii) the originator's address, or national identity number, or customer identification number, or date and place of birth.

(b) Required beneficiary information:

(i) the name of the beneficiary; and

(ii) the beneficiary account number where such an account is used to process the transaction or, in the absence of an account, a unique transaction reference number which permits traceability of the transaction.

16.2 Where several individual cross-border wire transfers from a single originator are bundled

(b) Required beneficiary information:

(i) the name of the beneficiary; and

(ii) the beneficiary account number where such an account is used to process the transaction or, in the absence of an account, a unique transaction reference number which permits traceability of the transaction

16.4 The information mentioned in criterion 16.3 need not be verified for accuracy. However, the financial institution should be required to verify the information pertaining to its customer where there is a suspicion of ML/TF.

16.5 For domestic wire transfers[57], the ordering financial institution should be required to ensure that the information accompanying the wire transfer includes originator information as indicated for cross-border wire transfers, unless this information can be made available to the beneficiary financial institution and appropriate authorities by other means.

16.6 Where the information accompanying the domestic wire transfer can be made available to the beneficiary financial institution and appropriate authorities by other means, the ordering financial institution need only be required to include the account number or a unique transaction reference number, provided that this number or identifier will permit the transaction to be traced back to the originator or the beneficiary. The ordering financial institution should be required to make the information available within three business days of receiving the request either from the beneficiary financial institution or from appropriate competent authorities. Law enforcement authorities should be able to compel immediate production of such information.

least five years, of all the information received from the ordering financial institution or another intermediary financial institution.

16.11 Intermediary financial institutions should be required to take reasonable measures, which are consistent with straight-through processing, to identify cross-border wire transfers that lack required originator information or required beneficiary information.

16.12 Intermediary financial institutions should be required to have risk-based policies and procedures for determining: (a) when to execute, reject, or suspend a wire transfer lacking required originator or required beneficiary information; and (b) the appropriate follow-up action.

16.13 Beneficiary financial institutions should be required to take reasonable measures, which may include post-event monitoring or real-time monitoring where feasible, to identify cross-border wire transfers that lack required originator information or required beneficiary information.

16.14 For cross-border wire transfers of USD/EUR 1 000 or more[58], a beneficiary financial institution should be required to verify the identity of the beneficiary, if the identity has not been previously verified, and maintain this information in accordance with Recommendation 11.

16.15 Beneficiary financial institutions should be required to have risk-based policies and procedures for determining: (a) when to execute, reject, or suspend a wire transfer lacking required originator or required beneficiary information; and (b) the appropriate follow-up action.

16.16 MVTS providers should be required to comply with all of the relevant requirements of Recommendation 16 in the countries in which they operate, directly or through their agents.

16.17 In the case of a MVTS provider that controls both the ordering and the beneficiary side of a wire transfer, the MVTS provider should be required to:

(a) take into account all the information from both the ordering and beneficiary sides in order to determine whether an STR has to be filed; and

(b) file an STR in any country affected by the suspicious wire transfer, and make relevant transaction information available to the Financial

16.18 Countries should ensure that, in the context of processing wire transfers, financial institutions take freezing action and comply with prohibitions from conducting transactions with designated persons and entities, as per obligations set out in the relevant UNSCRs relating to the prevention and suppression of terrorism and terrorist financing, such as UNSCRs 1267 and 1373, and their successor resolutions.

RECOMMENDATION 18 INTERNAL CONTROLS AND FOREIGN BRANCHES AND SUBSIDIARIES

18.1 Financial institutions should be required to implement programmes against ML/TF, which have regard to the ML/TF risks and the size of the business, and which include the following internal policies, procedures and controls:

(a) compliance management arrangements (including the appointment of a compliance officer at the management level);

(b) screening procedures to ensure high standards when hiring employees;

(c) an ongoing employee training programme; and

(d) an independent audit function to test the system.

18.2 Financial groups should be required to implement group-wide programmes against ML/TF, which should be applicable, and appropriate to, all branches and majority-owned subsidiaries of the financial group. These should include the measures set out in criterion 18.1 and also:

(a) policies and procedures for sharing information required for the purposes of CDD and ML/TF risk management;

(b) the provision, at group-level compliance, audit, and/or AML/CFT functions, of customer, account, and transaction information from branches and subsidiaries when necessary for AML/CFT purposes. This should include information and analysis of transactions or activities which appear unusual (if such analysis was done)[61]. Similarly branches and subsidiaries should receive such information from these group-level functions when relevant and appropriate to risk management[62]; and

(c) adequate safeguards on the confidentiality and use of information exchanged, including safeguards to prevent tipping-off.

18.3 Financial institutions should be required to ensure that their foreign branches and majority-owned subsidiaries apply AML/CFT measures consistent with the home country requirements, where the minimum AML/CFT requirements of the host country are less strict than those of the home country, to the extent that host country laws and regulations permit.

If the host country does not permit the proper implementation of AML/CFT measures consistent with the home country requirements, financial groups should be required to

61 This could include an STR, its underlying information, or the fact than an STR has been submitted.

62 The scope and extent of the information to be shared in accordance with this criterion may be determined by countries, based on the sensitivity of the information, and its relevance to AML/CFT risk management.

apply appropriate additional measures to manage the ML/TF risks, and inform their home supervisors.

RECOMMENDATION 19 HIGHER RISK COUNTRIES

19.1 Financial institutions should be required to apply enhanced due diligence, proportionate to the risks, to business relationships and transactions with natural and legal persons (including financial institutions) from countries for which this is called for by the FATF.

19.2 Countries should be able to apply countermeasures proportionate to the risks: (a) when called upon to do so by the FATF; and (b) independently of any call by the FATF to do so.

19.3 Countries should have measures in place to ensure that financial institutions are advised of concerns about weaknesses in the AML/CFT systems of other countries.

RECOMMENDATION 20 REPORTING OF SUSPICIOUS TRANSACTIONS[63]

20.1 If a financial institution suspects or has reasonable grounds to suspect that funds are the proceeds of a criminal activity[64], or are related to TF, it should be required to report promptly its suspicions to the Financial Intelligence Unit.

20.2 Financial institutions should be required to report all suspicious transactions, including attempted transactions, regardless of the amount of the transaction.

63 The requirement that financial institutions should report suspicious transactions should be set out in law.

64 "Criminal activity" refers to: (a) all criminal acts that would constitute a predicate offence for ML in the country; or (b) at a minimum, to those offences that would constitute a predicate offence, as required by Recommendation 3.

RECOMMENDATION 21 TIPPING-OFF AND CONFIDENTIALITY

21.1 Financial institutions and their directors, officers and employees should be protected by law from both criminal and civil liability for breach of any restriction on disclosure of information imposed by contract or by any legislative, regulatory or administrative provision, if they report their suspicions in good faith to the FIU. This protection should be available even if they did not know precisely what the underlying criminal activity was, and regardless of whether illegal activity actually occurred.

21.2 Financial institutions and their directors, officers and employees should be prohibited by law from disclosing the fact that an STR or related information is being filed with the Financial Intelligence Unit. These provisions are not intended to inhibit information sharing under Recommendation 18.

RECOMMENDATION 22 DESIGNATED NON-FINANCIAL BUSINESSES AND PROFESSIONS (DNFBPS): CUSTOMER DUE DILIGENCE

22.1 DNFBPs should be required to comply with the CDD requirements set out in Recommendation 10 in the following situations:

(a) Casinos – when customers engage in financial transactions[65] equal to or above USD/EUR 3 000.

(b) Real estate agents – when they are involved in transactions for a client concerning the buying and selling of real estate[66].

(c)

- acting as (or arranging for another person to act as) a trustee of an express trust or performing the equivalent function for another form of legal arrangement;
- acting as (or arranging for another person to act as) a nominee shareholder for another person.

22.2 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the record-keeping requirements set out in Recommendation 11.

22.3 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the PEPs requirements set out in Recommendation 12.

22.4 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the new technologies requirements set out in Recommendation 15.

22.5 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the reliance on third-parties requirements set out in Recommendation 17.

RECOMMENDATION 23 DNFBPS: OTHER MEASURES

23.1 The requirements to report suspicious transactions set out in Recommendation 20 should apply to all DNFBPs subject to the following qualifications:

(a) Lawyers, notaries, other independent legal professionals and accountants [67] – when, on behalf of, or for, a client, they engage in a financial transaction in relation to the activities described in criterion 22.1(d)[68].

(b) Dealers in precious metals or stones – when they engage in a cash transaction with a customer equal to or above USD/EUR 15,000.

(c) Trust and company service providers – when, on behalf or for a client, they engage in a transaction in relation to the activities described in criterion 22.1(e).

23.2 In the situations set out in criterion 23.1, DNFBPs should be required to comply with the internal controls requirements set out in Recommendation 18.

23.3 In the situations set out in criterion 23.1, DNFBPs should be required to comply with the higher-risk countries requirements set out in Recommendation 19.

23.4 In the situations set out in criterion 23.1, DNFBPs should be required to comply with the tipping-off and confidentiality requirements set out in Recommendation 21[69].

---

67 Lawyers, notaries, other independent legal professionals, and accountants acting as independent legal professionals, are not required to report suspicious transactions if the relevant information was obtained in circumstances where they are subject to professional secrecy or legal professional privilege. It is for each country to determine the matters that would fall under legal professional privilege or professional secrecy. This would normally cover information lawyers, notaries or other independent legal professionals receive from or obtain through one of their clients: (a) in the course of ascertaining the legal position of their client, or (b) in performing their task of defending or representing that client in, or concerning judicial, administrative, arbitration or mediation proceedings.

68 Where countries allow lawyers, notaries, other independent legal professionals and accountants to send their STRs to their appropriate self-regulatory bodies (SRBs), there should be forms of co-operation between these bodies and the FIU.

69 Where lawyers, notaries, other independent legal professionals and accountants acting as independent legal professionals seek to dissuade a client from engaging in illegal activity, this does not amount to tipping-off.

RECOMMENDATION 24 TRANSPARENCY AND BENEFICIAL OWNERSHIP OF LEGAL PERSONS[70]

24.1 Countries should have mechanisms that identify and describe: (a) the different types, forms and basic features of legal persons in the country; and (b) the processes for the creation of those legal persons, and for obtaining and recording of basic and beneficial ownership information. This information should be publicly available.

24.2 Countries should assess the ML/TF risks associated with all types of legal person created in the country.

24.3 Countries should require that all companies created in a country are registered in a company registry, which should record the company name, proof of incorporation, legal form and status, the address of the registered office, basic regulating powers, and a list of directors. This information should be publicly available.

24.4 Companies should be required to maintain the information set out in criterion 24.3, and also to maintain a register of their shareholders or members[71], containing the number of shares held by each shareholder and categories of shares (including the nature of the associated voting rights). This information should be maintained within the country at a location notified to the company registry[72].

24.5 Countries should have mechanisms that ensure that the information referred to in criteria 24.3 and 24.4 is accurate and updated on a timely basis.

Assessors should consider the application of all the criteria to all relevant types of legal persons. The manner in which these requirements are addressed may vary according to the type of legal person involved:

1. - The measures required by Recommendation 24 are set out with specific reference to companies.
2. - countries should take similar measures and impose similar requirements as those required for companies, taking into account their different forms and structures.
3. - countries should take into account the different forms and structures of those other legal persons, and the levels of ML/TF risks associated with each type of legal person, with a view to achieving appropriate levels of transparency. At a minimum, all legal persons should ensure that similar types of basic information are recorded.

71 The register of shareholders and members can be recorded by the company itself or by a third person under the company's responsibility.

72 In cases in which the company or company registry holds beneficial ownership information within the country, the register of shareholders and members need not be in the country, if the company can provide this information promptly on request.

24.6 Countries should use one or more of the following mechanisms to ensure that information on the beneficial ownership of a company is obtained by that company and available at a specified location in their country; or can be otherwise determined in a timely manner by a competent authority:

(a) requiring companies or company registries to obtain and hold up-to-date information on the companies' beneficial ownership;

(b) requiring companies to take reasonable measures to obtain and hold up-to-date information on the companies' beneficial ownership;

(c) using existing information, including: (i) information obtained by financial institutions and/or DNFBPs, in accordance with Recommendations 10 and 22; (ii) information held by other competent authorities on the legal and beneficial ownership of companies; (iii) information held by the company as required in criterion 24.3 above; and (iv) available information on companies listed on a stock exchange, where disclosure requirements ensure adequate transparency of beneficial ownership.

24.7 Countries should require that the beneficial ownership information is accurate and as up-to-date as possible.

24.8 Countries should ensure that companies co-operate with competent authorities to the fullest extent possible in determining the beneficial owner, by:

(a) requiring that one or more natural persons resident in the country is authorised by the company[73], and accountable to competent authorities, for providing all basic information and available beneficial ownership information, and giving further assistance to the authorities; and/or

(b) requiring that a DNFBP in the country is authorised by the company, and accountable to competent authorities, for providing all basic information and available beneficial ownership information, and giving further assistance to the authorities; and/or

(c) taking other comparable measures, specifically identified by the country.

24.9 All the persons, authorities and entities mentioned above, and the company itself (or its administrators, liquidators or other persons involved in the dissolution of the company), should be required to maintain the information and records referred to for at least five years after the date on which the company is dissolved or otherwise ceases to exist, or five years after the date on which the company ceases to be a customer of the professional intermediary or the financial institution.

[73] Members of the company's board or senior management may not require specific authorisation by the company.

24.10 Competent authorities, and in particular law enforcement authorities, should have all the powers necessary to obtain timely access to the basic and beneficial ownership information held by the relevant parties.

24.11 Countries that have legal persons able to issue bearer shares or bearer share warrants should apply one or more of the following mechanisms to ensure that they are not misused for money laundering or terrorist financing:

(a) prohibiting bearer shares and share warrants; or

(b) converting bearer shares and share warrants into registered shares or share warrants (for example through dematerialisation); or

(c) immobilising bearer shares and share warrants by requiring them to be held with a regulated financial institution or professional intermediary; or

(d) requiring shareholders with a controlling interest to notify the company, and the company to record their identity; or

(e) using other mechanisms identified by the country.

24.12 Countries that have legal persons able to have nominee shares and nominee directors should apply one or more of the following mechanisms to ensure they are not misused:

(a) requiring nominee shareholders and directors to disclose the identity of their nominator to the company and to any relevant registry, and for this information to be included in the relevant register;

(b) requiring nominee shareholders and directors to be licensed, for their nominee status to be recorded in company registries, and for them to maintain information identifying their nominator, and make this information available to the competent authorities upon request; or

(c) using other mechanisms identified by the country.

24.13 There should be liability and proportionate and dissuasive sanctions, as appropriate for any legal or natural person that fails to comply with the requirements.

24.14 Countries should rapidly provide international co-operation in relation to basic and beneficial ownership information, on the basis set out in Recommendations 37 and 40. This should include:

(a) facilitating access by foreign competent authorities to basic information held by company registries;

(b) exchanging information on shareholders; and

(c) using their competent authorities' investigative powers, in accordance with their domestic law, to obtain beneficial ownership information on behalf of foreign counterparts.

24.15 Countries should monitor the quality of assistance they receive from other countries in response to requests for basic and beneficial ownership information or requests for assistance in locating beneficial owners residing abroad.

RECOMMENDATION 25 TRANSPARENCY AND BENEFICIAL OWNERSHIP OF LEGAL ARRANGEMENTS[74]

25.1 Countries should require:

(a) trustees of any express trust governed under their law[75] to obtain and hold adequate, accurate, and current information on the identity of the settlor, the trustee(s), the protector (if any), the beneficiaries or class of beneficiaries, and any other natural person exercising ultimate effective control over the trust;

(b) trustees of any trust governed under their law to hold basic information on other regulated agents of, and service providers to, the trust, including investment advisors or managers, accountants, and tax advisors; and

(c) professional trustees to maintain this information for at least five years after their involvement with the trust ceases.

25.2 Countries should require that any information held pursuant to this Recommendation is kept accurate and as up to date as possible, and is updated on a timely basis.

25.3 All countries should take measures to ensure that trustees disclose their status to financial institutions and DNFBPs when forming a business relationship or carrying out an occasional transaction above the threshold.

25.4 Trustees should not be prevented by law or enforceable means from providing competent authorities with any information relating to the trust[76]; or from providing financial institutions and DNFBPs, upon request, with information on the beneficial ownership and the assets of the trust to be held or managed under the terms of the business relationship.

---

74 The measures required by Recommendation 25 are set out with specific reference to trusts. This should be understood as referring to express trusts (as defined in the glossary). In relation to other types of legal arrangement with a similar structure or function, countries should take similar measures to those required for trusts, with a view to achieving similar levels of transparency. At a minimum, countries should ensure that information similar to that specified in respect of trusts should be recorded and kept accurate and current, and that such information is accessible in a timely way by competent authorities. When considering examples provided in the Glossary definition of legal arrangement, assessors are reminded that the examples provided should not be considered definitive. Assessors should refer to the Glossary definition of trust and trustee which references Article 2 of the Hague Convention on the law applicable to trusts and their recognition when determining whether a legal arrangement has a similar structure or function to an express trust and therefore falls within the scope of R.25, regardless of whether the country denominates the legal arrangement using the same terminology. If a country does not apply the relevant obligations of R.25 on trustees (or those performing a similar function in relation to other legal arrangements), assessors should confirm whether such exemptions are consistent with criterion 1.6.

75 Countries are not required to give legal recognition to trusts. Countries need not include the requirements of Criteria 25.1; 25.2; 25.3; and 25.4 in legislation, provided that appropriate obligations to such effect exist for trustees (e.g. through common law or case law).

76 Domestic competent authorities or the relevant competent authorities of another country pursuant to an appropriate international cooperation request.

25.5 Competent authorities, and in particular law enforcement authorities, should have all the powers necessary to be able to obtain timely access to information held by trustees, and other parties (in particular information held by financial institutions and DNFBPs), on the beneficial ownership and control of the trust, including: (a) the beneficial ownership; (b) the residence of the trustee; and (c) any assets held or managed by the financial institution or DNFBP, in relation to any trustees with which they have a business relationship, or for which they undertake an occasional transaction.

25.6 Countries should rapidly provide international co-operation in relation to information, including beneficial ownership information, on trusts and other legal arrangements, on the basis set out in Recommendations 37 and 40. This should include:

(a) facilitating access by foreign competent authorities to basic information held by registries or other domestic authorities;

(b) exchanging domestically available information on the trusts or other legal arrangement; and

(c) using their competent authorities' investigative powers, in accordance with domestic law, in order to obtain beneficial ownership information on behalf of foreign counterparts.

25.7 Countries should ensure that trustees are either (a) legally liable for any failure to perform the duties relevant to meeting their obligations; or (b) that there are proportionate and dissuasive sanctions, whether criminal, civil or administrative, for failing to comply[77].

25.8 Countries should ensure that there are proportionate and dissuasive sanctions, whether criminal, civil or administrative, for failing to grant to competent authorities timely access to information regarding the trust referred to in criterion 25.1.

[77] This does not affect the requirements for proportionate and dissuasive sanctions for failure to comply with requirements elsewhere in the Recommendations.

RECOMMENDATION 26 REGULATION AND SUPERVISION OF FINANCIAL INSTITUTIONS

26.1 Countries should designate one or more supervisors that have responsibility for regulating and supervising (or monitoring) financial institutions' compliance with the AML/CFT requirements.

26.2 Core Principles financial institutions should be required to be licensed. Other financial institutions, including those providing a money or value transfer service or a money or currency changing service, should be licensed or registered. Countries shoulsuou

C o57en5Tc 0 04 a55Tc 6 0 587llsyI edm,.7 5it f. ol.5 (c)-3.6 148859 11fin.7 (l)ar3l(o)ia.(r3Jl)11.8 (in.7 (l)s

(c) the characteristics of the financial institutions or groups, in particular the diversity and number of financial institutions and the degree of discretion allowed to them under the risk-based approach.

26.6 The supervisor should review the assessment of the ML/TF risk profile of a financial institution or group (including the risks of non-compliance) periodically, and when there are major events or developments in the management and operations of the financial institution or group.

RECOMMENDATION 27 POWERS OF SUPERVISORS

27.1 Supervisors should have powers to supervise or monitor and ensure compliance by financial institutions with AML/CFT requirements.

27.2 Supervisors should have the authority to conduct inspections of financial institutions.

27.3 Supervisors should be authorised to compel[79] production of any information relevant to monitoring compliance with the AML/CFT requirements.

27.4 Supervisors should be authorised to impose sanctions in line with Recommendation 35 for failure to comply with the AML/CFT requirements. This should include powers to impose a range of disciplinary and financial sanctions, including the power to withdraw, restrict or suspend the financial institution's licence.

[79] The supervisor's power to compel production of or to obtain access for supervisory purposes should not be predicated on the need to require a court order.

RECOMMENDATION 28 REGULATION AND SUPERVISION OF DNFBPS

28.1 Countries should ensure that casinos are subject to AML/CFT regulation and supervision. At a minimum:

(a) Countries should require casinos to be licensed.

(b) Competent authorities should take the necessary legal or regulatory measures to prevent criminals or their associates from holding (or being the beneficial owner of) a significant or controlling interest, or holding a management function, or being an operator of a casino.

(c) Casinos should be supervised for compliance with AML/CFT requirements.

28.2 There should be a designated competent authority or SRB responsible for monitoring and ensuring compliance of DNFBPs with AML/CFT requirements.

28.3 Countries should ensure that the other categories of DNFBPs are subject to systems for monitoring compliance with AML/CFT requirements.

28.4 The designated competent authority or self-regulatory body (SRB) should:

(a) have adequate powers to perform its functions, including powers to monitor compliance;

(b) take the necessary measures to prevent criminals or their associates from being professionally accredited, or holding (or being the beneficial owner of) a significant or controlling interest, or holding a management function in a DNFBP; and

(c) have sanctions available in line with Recommendation 35 to deal with failure to comply with AML/CFT requirements.

28.5 Supervision of DNFBPs should be performed on a risk-sensitive basis, including:

(a) determining the frequency and intensity of AML/CFT supervision of DNFBPs on the basis of their understanding of the ML/TF risks, taking into consideration the characteristics of the DNFBPs, in particular their diversity and number; and

(b) taking into account the ML/TF risk profile of those DNFBPs, and the degree of discretion allowed to them under the risk-based approach, when assessing the adequacy of the AML/CFT internal controls, policies and procedures of DNFBPs.

RECOMMENDATION 29 FINANCIAL INTELLIGENCE UNITS (FIU)

29.1 Countries should establish an FIU with responsibility for acting as a national centre for receipt and analysis of suspicious transaction reports and other information relevant to money laundering, associated predicate offences and terrorist financing; and for the dissemination of the results of that analysis.[80]

29.2 The FIU should serve as the central agency for the receipt of disclosures filed by reporting entities, including:

(a) Suspicious transaction reports filed by reporting entities as required by Recommendation 20 and 23; and

(b) any other information as required by national legislation (such as cash transaction reports, wire transfers reports and other threshold-based declarations/disclosures).

29.3 The FIU should[81]:

(a) in addition to the information that entities report to the FIU, be able to obtain and use additional information from reporting entities, as needed to perform its analysis properly; and

(b) have access to the widest possible range[82] of financial, administrative and law enforcement information that it requires to properly undertake its functions.

29.4 The FIU should conduct:

(a) operational analysis, which uses available and obtainable information to identify specific targets, to follow the trail of particular activities or transactions, and to determine links between those targets and possible proceeds of crime, money laundering, predicate offences and terrorist financing; and

(b) strategic analysis, which uses available and obtainable information, including data that may be provided by other competent authorities, to identify money laundering and terrorist financing related trends and patterns.

29.5 The FIU should be able to disseminate, spontaneously and upon request, information and the results of its analysis to relevant competent authorities, and should use dedicated, secure and protected channels for the dissemination.

---

80 Considering that there are different FIU models, Recommendation 29 does not prejudge a country's choice for a particular model, and applies equally to all of them.

81 In the context of its analysis function, an FIU should be able to obtain from any reporting entity additional information relating to a suspicion of ML/TF. This does not include indiscriminate requests for information to reporting entities in the context of the FIU's analysis (e.g., "fishing expeditions").

82 This should include information from open or public sources, as well as relevant information collected and/or maintained by, or on behalf of, other authorities and, where appropriate commercially held data.

29.6 The FIU should protect information by:

(a) having rules in place governing the security and confidentiality of information, including procedures for handling, storage, dissemination, and protection of, and access to, information;

(b) ensuring that FIU staff members have the necessary security clearance levels and understanding of their responsibilities in handling and disseminating sensitive and confidential information; and

(c) ensuring that there is limited access to its facilities and information, including information technology systems.

29.7 The FIU should be operationally independent and autonomous, by:

(a) having the authority and capacity to carry out its functions freely, including the autonomous decision to analyse, request and/or forward or disseminate specific information;

(b) being able to make arrangements or engage independently with other domestic competent authorities or foreign counterparts on the exchange of information;

(c) when it is located within the existing structure of another authority, having distinct core functions from those of the other authority; and

(d) being able to obtain and deploy the resources needed to carry out its functions, on an individual or routine basis, free from any undue political, government or industry influence or interference, which might compromise its operational independence.

29.8 Where a country has created an FIU and is not an Egmont Group member, the FIU should apply for membership in the Egmont Group. The FIU should submit an unconditional application for membership to the Egmont Group and fully engage itself in the application process.

RECOMMENDATION 30 RESPONSIBILITIES OF LAW ENFORCEMENT AND INVESTIGATIVE AUTHORITIES

30.1 There should be designated law enforcement authorities that have responsibility for ensuring that money laundering, associated predicate offences and terrorist financing offences are properly investigated, within the framework of national AML/CFT policies.

30.2

RECOMMENDATION 31 POWERS OF LAW ENFORCEMENT AND INVESTIGATIVE AUTHORITIES

31.1 Competent authorities conducting investigations of money laundering, associated predic

RECOMMENDATION 32 CASH COURIERS

:
Recommendation 32 may be implemented on a supra-national basis by a supra-national jurisdiction, such that only movements that cross the external borders of the supra-national jurisdiction are considered to be cross-border for the purposes of Recommendation 32. Such arrangements are assessed on a supra-national basis, on the basis set out in Annex I.

32.1 Countries should implement a declaration system or a disclosure system for incoming and outgoing cross-border transportation of currency and bearer negotiable instruments (BNIs). Countries should ensure that a declaration or disclosure is required for all physical cross-border transportation, whether by travellers or through mail and cargo, but may use different systems for different modes of transportation.

32.2 In a declaration system, all persons making a physical cross-border transportation of currency or BNIs, which are of a value exceeding a pre-set, maximum threshold of USD/EUR 15 000, should be required to submit a truthful declaration to the designated competent authorities. Countries may opt from among the following three different types of declaration system:

(a) A written declaration system for all travellers;

(b) A written declaration system for all travellers carrying amounts above a threshold; and/or

(c) An oral declaration system for all travellers.

32.3 In a disclosure system, travellers should be required to give a truthful answer and provide the authorities with appropriate information upon request, but are not required to make an upfront written or oral declaration.

32.4 Upon discovery of a false declaration or disclosure of currency or BNIs or a failure to declare or disclose them, designated competent authorities should have the authority to request and obtain further information from the carrier with regard to the origin of the currency or BNIs, and their intended use.

32.5 Persons who make a false declaration or disclosure should be subject to proportionate and dissuasive sanctions, whether criminal, civil or administrative.

32.6 Information obtained through the declaration/disclosure process should be available to the FIU either through: (a) a system whereby the FIU is notified about suspicious cross-border transportation incidents; or (b) by making the declaration/disclosure information directly available to the FIU in some other way.

32.7 At the domestic level, countries should ensure that there is adequate co-ordination among customs, immigration and other related authorities on issues related to the implementation of Recommendation 32.

32.8 Competent authorities should be able to stop or restrain currency or BNIs for a reasonable time in order to ascertain whether evidence of ML/TF may be found in cases:

(a) where there is a suspicion of ML/TF or predicate offences; or

(b) where there is a false declaration or false disclosure.

32.9 Countries should ensure that the declaration/disclosure system allows for international co-operation and assistance, in accordance with Recommendations 36 to 40. To facilitate such co-operation, information[84] shall be retained when:

(a) a declaration or disclosure which exceeds the prescribed threshold is made; or

(b) there is a false declaration or false disclosure; or

(c) there is a suspicion of ML/TF.

32.10 Countries should ensure that strict safeguards exist to ensure proper use of information collected through the declaration/disclosure systems, without restricting either: (i) trade payments between countries for goods and services; or (ii) the freedom of capital movements, in any way.

32.11 Persons who are carrying out a physical cross-border transportation of currency or BNIs that are related to ML/TF or predicate offences should be subject to: (a) proportionate and dissuasive sanctions, whether criminal, civil or administrative; and (b) measures consistent with Recommendation 4 which would enable the confiscation of such currency or BNIs.

84 At a minimum, the information should set out (i) the amount of currency or BNIs declared, disclosed or otherwise detected, and (ii) the identification data of the bearer(s).

RECOMMENDATION 33 STATISTICS

33.1 Countries should maintain comprehensive statistics on matters relevant to the effectiveness and efficiency of their AML/CFT systems.[85] This should include keeping statistics on:

(a) STRs, received and disseminated;

(b) ML/TF investigations, prosecutions and convictions;

(c) Property frozen; seized and confiscated; and

(d) Mutual legal assistance or other international requests for co-operation made and received.

[85] For purposes of technical compliance, the assessment should be limited to the four areas listed below.

RECOMMENDATION 34 GUIDANCE AND FEEDBACK

34.1 Competent authorities, supervisors, and SRBs should establish guidelines and provide feedback, which will assist financial institutions and DNFBPs in applying national AML/CFT measures, and in particular, in detecting and reporting suspicious transactions.

RECOMMENDATION 35 SANCTIONS

35.1 Countries should ensure that there is a range of proportionate and dissuasive sanctions, whether criminal, civil or administrative, available to deal with natural or legal persons that fail to comply with the AML/CFT requirements of Recommendations 6, and 8 to 23.[86]

35.2 Sanctions should be applicable not only to financial institutions and DNFBPs but also to their directors and senior management.

[86] The sanctions should be directly or indirectly applicable for a failure to comply. They need not be in the same document that imposes or underpins the requirement, and can be in another document, provided there are clear links between the requirement and the available sanctions.

RECOMMENDATION 36 INTERNATIONAL INSTRUMENTS

36.1 Countries should become a party to the Vienna Convention, the Palermo Convention, the United Nations Convention against Corruption (the Merida Convention) and the Terrorist Financing Convention.

36.2 Countries should fully implement[87] the Vienna Convention, the Palermo Convention, the Merida Convention[88] and the Terrorist Financing Convention.

87 The relevant articles are: the Vienna Convention (Articles 3-11, 15, 17 and 19), the Palermo Convention (Articles 5-7, 10-16, 18-20, 24-27, 29-31, & 34), the Merida Convention (Articles 14-17, 23-24, 26-31, 38, 40, 43-44, 46, 48, 50-55, 57-58), and the Terrorist Financing Convention (Articles 2-18).

88 The UNCAC Implementation Review Mechanism (IRM), for which the UNODC serves as secretariat, is

RECOMMENDATION 37 MUTUAL LEGAL ASSISTANCE

37.1 Countries should have a legal basis that allows them to rapidly provide the widest possible range of mutual legal assistance in relation to money laundering, associated predicate offences and terrorist financing investigations, prosecutions and related proceedings.

37.2 Countries should use a central authority, or another established official mechanism, for the transmission and execution of requests. There should be clear processes for the timely prioritisation and execution of mutual legal assistance requests. To monitor progress on requests, a case management system should be maintained.

37.3 Mutual legal assistance should not be prohibited or made subject to unreasonable or unduly restrictive conditions.

37.4 Countries should not refuse a request for mutual legal assistance:

(a) on the sole ground that the offence is also considered to involve fiscal matters; or

(b) on the grounds of secrecy or confidentiality requirements on financial institutions or DNFBPs, except where the relevant information that is sought is held in circumstances where legal professional privilege or legal professional secrecy applies.

37.5 Countries should maintain the confidentiality of mutual legal assistance requests that they receive and the information contained in them, subject to fundamental principles of domestic law, in order to protect the integrity of the investigation or inquiry.

37.6 Where mutual legal assistance requests do not involve coercive actions, countries should not make dual criminality a condition for rendering assistance.

37.7 Where dual criminality is required for mutual legal assistance, that requirement should be deemed to be satisfied regardless of whether both countries place the offence within the same category of offence, or denominate the offence by the same terminology, provided that both countries criminalise the conduct underlying the offence.

37.8 Powers and investigative techniques that are required under Recommendation 31 or otherwise available to domestic competent authorities should also be available for use in response to requests for mutual legal assistance, and, if consistent with the domestic framework, in response to a direct request from foreign judicial or law enforcement authorities to domestic counterparts. These should include:

(a) all of the specific powers required under Recommendation31 relating to the production, search and seizure of information, documents, or evidence (including financial records) from financial institutions, or other natural or legal persons, and the taking of witness statements; and

(b) a broad range of other powers and investigative techniques.

RECOMMENDATION 38 MUTUAL LEGAL ASSISTANCE: FREEZING AND CONFISCATION

38.1 Countries should have the authority to take expeditious action in response to requests by foreign countries to identify, freeze, seize, or confiscate:

(a) laundered property from,

(b) proceeds from,

(c) instrumentalities used in, or

(d) instrumentalities intended for use in,

money laundering, predicate offences, or terrorist financing; or

(e) property of corresponding value.

38.2 Countries should have the authority to provide assistance to requests for co-operation made on the basis of non-conviction based confiscation proceedings and related provisional measures, at a minimum in circumstances when a perpetrator is unavailable by reason of death, flight, absence, or the perpetrator is unknown, unless this is inconsistent with fundamental principles of domestic law.

38.3 Countries should have: (a) arrangements for co-ordinating seizure and confiscation actions with other countries; and (b) mechanisms for managing, and when necessary disposing of, property frozen, seized or confiscated.

38.4 Countries should be able to share confiscated property with other countries, in particular when confiscation is directly or indirectly a result of co-ordinated law enforcement actions.

RECOMMENDATION 39 EXTRADITION

39.1 Countries should be able to execute extradition requests in relation to ML/TF without undue delay. In particular, countries should:

(a) ensure ML and TF are extraditable offences;

(b) ensure that they have a case management system, and clear processes for the timely execution of extradition requests including prioritisation where appropriate; and

(c) not place unreasonable or unduly restrictive conditions on the execution of requests.

39.2 Countries should either:

(a) extradite their own nationals; or

(b) where they do not do so solely on the grounds of nationality, should, at the request of the country seeking extradition, submit the case without undue delay to its competent authorities for the purpose of prosecution of the offences set forth in the request.

39.3 Where dual criminality is required for extradition, that requirement should be deemed to be satisfied regardless of whether both countries place the offence within the same category of offence, or denominate the offence by the same terminology, provided that both countries criminalise the conduct underlying the offence.

39.4 Consistent with fundamental principles of domestic law, countries should have simplified extradition mechanisms[89] in place.

[89] Such as allowing direct transmission of requests for provisional arrests between appropriate authorities, extraditing persons based only on warrants of arrests or judgments, or introducing a simplified extradition of consenting persons who waive formal extradition proceedings.

RECOMMENDATION 40 OTHER FORMS OF INTERNATIONAL CO-OPERATION

40.1

40.7 Competent authorities should maintain appropriate confidentiality for any request for co-operation and the information exchanged, consistent with both parties' obligations concerning privacy and data protection. At a minimum, competent authorities should protect exchanged information in the same manner as they would protect similar information received from domestic sources. Competent authorities should be able to refuse to provide information if the requesting competent authority cannot protect the information effectively.

40.8 Competent authorities should be able to conduct inquiries on behalf of foreign counterparts, and exchange with their foreign counterparts all information that would be obtainable by them if such inquiries were being carried out domestically.

40.9 FIUs should have an adequate legal basis for providing co-operation on money laundering, associated predicate offences and terrorist financing[90].

40.10 FIUs should provide feedback to their foreign counterparts, upon request and whenever possible, on the use of the information provided, as well as on the outcome of the analysis conducted, based on the information provided.

40.11 FIUs should have the power to exchange:

(a) all information required to be accessible or obtainable directly or indirectly by the FIU, in particular under Recommendation 29; and

(b) any other information which they have the power to obtain or access, directly or indirectly, at the domestic level, subject to the principle of reciprocity.

40.12 Financial supervisors should have a legal basis for providing co-operation with their foreign counterparts (regardless of their respective nature or status), consistent with the applicable international standards for supervision, in particular with respect to the exchange of supervisory information related to or relevant for AML/CFT purposes.

40.13 Financial supervisors should be able to exchange with foreign counterparts information domestically available to them, including information held by financial institutions, in a manner proportionate to their respective needs.

40.14 Financial supervisors should be able to exchange the following types of information when relevant for AML/CFT purposes, in particular with other supervisors that have a shared responsibility for financial institutions operating in the same group:

---

90 FIUs should be able to provide cooperation regardless of whether their counterpart FIU is administrative, law enforcement, judicial or other in nature.

91 This refers to financial supervisors which are competent authorities and does not include financial supervisors which are SRBs.

that the competent authority that requests information indirectly always makes it clear for what purpose and on whose behalf the request is made.

authority. Such an exchange of information and its use may be subject to the authorisation of one or more competent authorities of the requested country.

EFFECTIVENESS ASSESSMENT

Immediate Outcome 1	Money laundering and terrorist financing risks are understood and, where appropriate, actions co-ordinated domestically to combat money laundering and the financing of terrorism and proliferation.

A country properly identifies, assesses and understands its money laundering and terrorist

1.3. To what extent are the results of the assessment(s) of risks properly used to justify exemptions and support the application of enhanced measures for higher risk scenarios, or simplified measures for lower risk scenarios?

1.4. To what extent are the objectives and activities of the competent authorities and SRBs consistent with the evolving national AML/CFT policies and with the ML/TF risks identified?

1.5. To what extent do the competent authorities and SRBs co-operate and co-ordinate the development and implementation of policies[93] and activities to combat ML/TF and, where appropriate, the financing of proliferation of weapons of mass destruction?[94]

1.6. To what extent does the country ensure that respective financial institutions, DNFBPs and other sectors affected by the application of the FATF Standards are aware of the relevant results of the national ML/TF risk assessment(s)?

1. The country's assessment(s) of its ML/TF risks (e.g.,).
2. AML/CFT policies and strategies (e.g.,).
3. Outreach activities to private sector and relevant authorities (e.g.,).

4. What are the methods, tools, and information used to develop, review and evaluate the conclusions of the assessment(s) of risks? How comprehensive are the information and data used?
5. How useful are strategic financial intelligence, analysis, typologies, and guidance?
6. Which competent authorities and relevant stakeholders (including financial institutions and DNFBPs) are involved in the assessment(s) of risks? How do they provide inputs to the national level ML/TF assessment(s) of risks, and at what stage?
7. Is the assessment(s) of risks kept up-to-date, reviewed regularly and responsive to significant events or developments (including new threats and trends)?

---

93 Having regard to AML/CFT requirements and Data Protection and Privacy rules and other similar provisions (e.g. data security/localisation) as needed.

94 Considering that there are different forms of co-operation and co-ordination between relevant authorities, Core Issue 1.5 does not prejudge a country's choice for a particular form and applies equally to all of them.

Immediate Outcome 2	International co-operation delivers appropriate information, financial intelligence, and evidence, and facilitates action against criminals and their assets.

The country provides constructive and timely information or assistance when requested by other countries. Competent authorities assist with requests to:

- locate and extradite criminals; and
- identify, freeze, seize, confiscate and share assets and provide information (including evidence, financial intelligence, supervisory and beneficial ownership information) related to money laundering, terrorist financing or associated predicate offences.

Competent authorities also seek international co-operation to pursue criminals and their assets. Over time, this makes the country an unattractive location for criminals (including terrorists) to operate in, maintain their illegal proceeds in, or use as a safe haven.

This outcome relates primarily to Recommendations 36 - 40 and also elements of Recommendations 9, 15, 24, 25 and 32.

Assessors should take into consideration how their findings on the specific role of relevant competent authorities in seeking and delivering international co-operation under this IO would impact other IOs (particularly IO.3, IO.5, IOs. 6 to 10) including how the country seeks international co-operation with respect to domestic cases when appropriate.

Core Issues to be considered in determining if the Outcome is being achieved

2.1. To what extent has the country provided constructive and timely mutual legal assistance and extradition across the range of international co-operation requests? What is the quality of such assistance provided?

2.2. To what extent has the country sought legal assistance for international co-operation in an appropriate and timely manner to pursue domestic ML, associated predicate offences and TF cases which have transnational elements?

2.3. To what extent do the different competent authorities seek other forms of international co-operation to exchange financial intelligence and supervisory, law enforcement or other information in an appropriate and timely manner with their foreign counterparts for AML/CFT purposes?

2.4. To what extent do the different competent authorities provide (including spontaneously) other forms of international co-operation to exchange financial intelligence and supervisory, law enforcement or other information in a constructive and timely manner with their foreign counterparts for AML/CFT purposes?

2.5. How well are the competent authorities providing and responding to foreign requests for co-operation in identifying and exchanging basic and beneficial ownership information of legal persons and arrangements?

1. Evidence of handling and making requests for international co-operation with respect to extradition, mutual legal assistance and other forms of international co-operation (

).

2. Types and number of co-operation arrangements with other countries (including bilateral and multilateral MOUs, treaties, co-operation based on reciprocity, or other co-operation mechanisms).

3. Examples of: (a) making requests for, and (b) providing successful international co-operation (e.g.

).

4. Information on investigations, prosecutions, confiscation and repatriation/sharing of assets (e.g.,

).

5. What operational measures are in place to ensure that appropriate safeguards are applied, requests are handled in a confidential manner to protect the integrity of the process (investigations and inquiry), and information exchanged is used for authorised purposes?

6. What mechanisms (including case management systems) are used among the different competent authorities to receive, assess, prioritise and respond to requests for assistance?

7. What are the reasons for refusal in cases where assistance is not or cannot be provided?

8. What mechanisms (including case management systems) are used among the different competent authorities to select, prioritise and make requests for assistance?

9. How do different competent authorities ensure that relevant and accurate information is provided to the requested country to allow it to understand and assess the requests?

10. How well has the country worked with the requesting or requested country to avoid or resolve conflicts of jurisdiction or problems caused by poor quality information in requests?

11. How do competent authorities ensure that details of the contact persons and requirements for international co-operation requests are clear and easily available to requesting countries?

12. To what extent does the country prosecute its own nationals without undue delay in situations when it is unable by law to extradite them?

13. What measures and arrangements are in place to manage and repatriate assets confiscated at the request of other countries?

14. Are there aspects of the legal, operational or judicial process (excessively strict application of dual criminality requirements etc.) that impede or hinder international co-operation?

15. To what extent are competent authorities exchanging information, indirectly, with non-counterparts?

16. Are adequate resources available for: (a) receiving, managing, coordinating and responding to incoming requests for co-operation; and (b) making and coordinating requests for assistance in a timely manner?

Immediate Outcome 3	Supervisors appropriately supervise, monitor and regulate financial institutions, DNFBPs and VASPs for compliance with AML/CFT requirements commensurate with their risks.

Supervision and monitoring address and mitigate the money laundering and terrorist financing risks in the financial and other relevant sectors by:

- preventing criminals and their associates from holding, or being the beneficial owner of, a significant or controlling interest or a management function in financial institutions, DNFBPs or VASPs; and
- promptly identifying, remedying, and sanctioning, where appropriate, violations of AML/CFT requirements or failings in money laundering and terrorist financing risk management.

Supervisors[95] provide financial institutions, DNFBPs and VASPs with adequate feedback and guidance on compliance with AML/CFT requirements. Over time, supervision and monitoring improve the level of AML/CFT compliance, and discourage attempts by criminals to abuse the financial, DNFBP and VASP sectors, particularly in the sectors most exposed to money laundering and terrorist financing risks.

This outcome relates primarily to Recommendations 14, 15, 26 to 28, 34 and 35, and also elements of Recommendations 1 and 40.

1) Assessors should determine which financial, DNFBP and VASP sectors to weight as being most important, moderately important or less important, and should reflect their judgment in Chapters 1, 5 and 6 of the report. While judging on the overall effectiveness of this IO, assessors should explain how they have weighted the identified deficiencies and also explain how these have been taken into account in relation to how the assessors have weighted the different sectors.

2) When determining how to weight the various financial, DNFBP and VASP sectors, assessors should consider their relative importance, taking into account the following factors:

a) the ML/TF risks facing each sector, taking into account the materiality relevant to each sector (e.g. the relative importance of different parts of the financial sector and different

95 In relation to financial institutions and DNFBPs (but not to VASPs), references to "Supervisors" include SRBs for the purpose of the effectiveness assessment.

1. Contextual factors regarding the size, composition, and structure of the financial, DNFBP and VASP sectors and informal or unregulated sector (e.g.,

).
2. Supervisors' risk models, manuals and guidance on AML/CFT (e.g.,

).
3. Information on supervisory engagement with the industry, the FIU and other competent authorities on AML/CFT issues (e.g.,

).
4. Information on supervision (e.g.,

   (e.g.,

).

5. What are the measures implemented to prevent the establishment or continued operation of shell banks in the country?
6. To what extent are "fit and proper" tests or other similar measures used with regard to persons holding senior management functions, holding a significant or controlling interest, or professionally accredited in financial institutions, DNFBPs and VASPs?
7. What measures do supervisors employ in order to assess the ML/TF risks of the sectors and entities they supervise/monitor? How often are the risk profiles reviewed, and what are the trigger events (e.g., changes in management or business activities)?
8. What measures and supervisory tools are employed to ensure that financial institutions (including financial groups), DNFBPs and VASPs are regulated and comply with their AML/CFT obligations (including those which relate to targeted financial sanctions on terrorism, and to countermeasures called for by the FATF)? To what extent has this promoted the use of the formal financial system?
9. To what extent do the frequency, intensity and scope of on-site and off-site inspections relate to the risk profile of the financial institutions (including financial group), DNFBPs and VASPs?
10. What is the level of co-operation between supervisors and other competent authorities in relation to AML/CFT (including financial group ML/TF risk management) issues? What are the circumstances where supervisors share or seek information from other competent authorities with regard to AML/CFT issues (including market entry)?

11. What measures are taken to identify, license or register, monitor and sanction as appropriate, persons who carry out MVTs and virtual asset services or activities?

12. Do supervisors have adequate resources to conduct supervision or monitoring for AML/CFT purposes, taking into account the size, complexity and risk profiles of the sector supervised or monitored?

13. What are the measures implemented to ensure that financial supervisors have operational independence so that they are not subject to undue influence on AML/CFT matters?

Immediate Outcome 4	Financial institutions, DNFBPs and VASPs adequately apply AML/CFT preventive measures commensurate with their risks, and report suspicious transactions.

Financial institutions, DNFBPs and VASPs understand the nature and level of their money laundering and terrorist financing risks; develop and apply AML/CFT policies (including group-wide policies), internal controls, and programmes to adequately mitigate those risks; apply appropriate CDD measures to identify and verify the identity of their customers (including the beneficial owners) and conduct ongoing monitoring; adequately detect and report suspicious transactions; and comply with other AML/CFT requirements. This ultimately leads to a reduction in money laundering and terrorist financing activity within these entities.

This outcome relates primarily to Recommendations 9 to 23, and also elements of Recommendations 1, 6 and 29.

1) Assessors should determine which financial, DNFBP and VASP sectors to weight as being most important, moderately important or less important, and should reflect their judgment in Chapters 1, 5 and 6 of the report. While judging on the overall effectiveness of this IO, assessors should explain how they have weighted the identified deficiencies and also explain how these have been taken into account in relation to how the assessors have weighted the different sectors.

2) When determining how to weight the various financial, DNFBP and VASP sectors, assessors should consider their relative importance, taking into account the following factors:

a) the ML/TF risks facing each sector, taking into account the materiality relevant to each sector (e.g. the relative importance of different parts of the financial sector and different DNFBPs and VASPs; the size, integration and make-up of the financial sector[98]; the relative importance of different types of financial products or institutions; the amount of business which is domestic or cross-border; the extent to which the economy is cash-based; and estimates of the size of the informal sector and/or shadow economy), and

98 E.g. including, but not limited to, the business concentration in the different sectors.

b) structural elements and other contextual factors (e.g. whether established supervisors with accountability, integrity and transparency are in place for each sector; and the maturity and sophistication of the regulatory and supervisory regime for each sector)[99].

For more information on how assessors should take risk, materiality, structural elements and other contextual factors into account, see paragraphs 5 to 12 of the Methodology. For more guidance on how to reflect in the report their judgment on the relative importance of the financial, DNFBP and VASP sectors, see the Mutual Evaluation Report Template in Annex II of the Methodology.

3) Assessors are not expected to conduct an in-depth review of the operations of financial institutions, DNFBPs or VASPS, but should consider, on the basis of evidence and interviews with supervisors, FIUs, financial institutions, DNFBPs and VASPs, whether financial institutions, DNFBPs and VASPs have adequately assessed and understood their exposure to money laundering and terrorist financing risks; whether their policies, procedures and internal controls adequately address these risks; and whether regulatory requirements (including STR reporting) are being properly implemented.

Core Issues to be considered in determining if the Outcome is being achieved

4.1. How well do financial institutions, DNFBPs and VASPs understand their ML/TF risks and AML/CFT obligations?

4.2. How well do financial institutions, DNFBPs and VASPs apply mitigating measures commensurate with their risks?

4.3. How well do financial institutions, DNFBPs and VASPs apply the CDD and record-keeping measures (including beneficial ownership information and ongoing monitoring)? To what extent is business refused when CDD is incomplete?

4.4. How well do financial institutions, DNFBPs and VASPs apply the enhanced or specific measures for: (a) PEPs, (b) correspondent banking, (c) new technologies, (d) wire transfer rules[100], (e) targeted financial sanctions relating to TF, and (f) higher-risk countries identified by the FATF?

4.5. To what extent do financial institutions, DNFBPs and VASPs meet their reporting obligations on the suspected proceeds of crime and funds in support of terrorism? What are the practical measures to prevent tipping-off?

4.6. How well do financial institutions, DNFBPs and VASPs apply internal controls and procedures (including at financial group level) to ensure compliance with AML/CFT requirements? To what extent are there legal or regulatory requirements (financial secrecy) impeding its implementation?

---

99 E.g. special supervisory activities, such as thematic reviews and targeted outreach to specific sectors or institutions.

100 In the context of VASPs, this refers to virtual asset transfer rules.

1. Contextual factors regarding the size, composition, and structure of the financial, DNFBP and VASP sectors and informal or unregulated sector (e.g.

).
2. Information (including trends) relating to risks and general levels of compliance (e.g.,

).
3. Examples of compliance failures (e.g.,

).
4. Information on compliance by financial institutions, DNFBPs and VASPs (e.g.,

).
5. Information on STR reporting and other information as required by national legislation (e.g.,

12. What are the measures and tools employed to assess risk, formulate and review policy responses, and institute appropriate risk mitigation and systems and controls for ML/TF risks?

13. How are AML/CFT policies and controls communicated to senior management and staff? What remedial actions and sanctions are taken by financial institutions, DNFBPs and VASPs when AML/CFT obligations are breached?

14. How well are financial institutions, DNFBPs and VASPs documenting their ML/TF risk assessments, and keeping them up to date?

15. Do financial institutions, DNFBPs and VASPs have adequate resources to implement AML/CFT policies and controls relative to their size, complexity, business activities and risk profile?

16. How well is feedback provided to assist financial institutions, DNFBPs and VASPs in detecting and reporting suspicious transactions?

Immediate Outcome 5	Legal persons and arrangements are prevented from misuse for money laundering or terrorist financing, and information on their beneficial ownership is available to competent authorities without impediments.

Measures are in place to:

- prevent legal persons and arrangements from being used for criminal purposes;
- make legal persons and arrangements sufficiently transparent; and
- ensure that accurate and up-to-date basic and beneficial ownership information is available on a timely basis.

Basic information is available publicly, and beneficial ownership information is available to competent authorities. Persons who breach these measures are subject to effective, proportionate and dissuasive sanctions. This results in legal persons and arrangements being unattractive for criminals to misuse for money laundering and terrorist financing.

This outcome relates primarily to Recommendations 24 and 25, and also elements of Recommendations 1, 10, 37 and 40.

Assessors should also consider the relevant findings in relation to the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent to which competent authorities seek and are able to provide the appropriate assistance in relation to identifying and exchanging information (including beneficial ownership information) for legal persons and arrangements.

Core Issues to be considered in determining if the Outcome is being achieved

5.1. To what extent is the information on the creation and types of legal persons and arrangements in the country available publicly?

5.2. How well do the relevant competent authorities identify, assess and understand the vulnerabilities, and the extent to which legal persons created in the country can be, or are being misused for ML/TF?

5.3. How well has the country implemented measures to prevent the misuse of legal persons and arrangements for ML/TF purposes?

5.4. To what extent can relevant competent authorities obtain adequate, accurate and current basic and beneficial ownership information on all types of legal persons created in the country, in a timely manner?

5.5. To what extent can relevant competent authorities obtain adequate, accurate and current beneficial ownership information on legal arrangements, in a timely manner?

5.6. To what extent are effective, proportionate and dissuasive sanctions applied against persons who do not comply with the information requirements?

1. Contextual inform1ation on the types, forms and basic features of legal pe.2 7 Tc -9mns anp i

up to date? Where applicable, to what extent are similar changes in legal arrangements registered in a timely manner?

10. To what extent can financial institutions and DNFBPs obtain accurate and up-to-date basic and beneficial ownership information on legal persons and arrangements? What is the extent of information that trustees disclose to financial institutions and DNFBPs?

11. Do the relevant authorities have adequate resources to implement the measures adequately?

Immediate Outcome 6	Financial intelligence and all other relevant information are appropriately used by competent authorities for money laundering and terrorist financing investigations.

A wide variety of financial intelligence and other relevant information is collected and used by competent authorities to investigate money laundering, associated predicate offences and terrorist financing. This delivers reliable, accurate, and up-to-date information; and the competent authorities have the resources and skills to use the information to conduct their analysis and financial investigations, to identify and trace the assets, and to develop operational analysis.

This outcome relates primarily to Recommendations 29 to 32 and also elements of Recommendations 1, 2, 4, 8, 9, 15, 34 and 40.

1) This outcome includes the work that the FIU does to analyse STRs and other data; and the use by competent authorities of FIU products, other types of financial intelligence and other relevant information[101].

2) Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent which FIUs and law enforcement agencies are able to, and do seek appropriate financial and law enforcement intelligence and other information from their foreign counterparts.

Core Issues to be considered in determining if the Outcome is being achieved

6.1. To what extent are financial intelligence and other relevant information accessed and used in investigations to develop evidence and trace criminal proceeds related to ML, associated predicate offences and TF?

[101] The sources include information derived from STRs, cross-border reports on currency and bearer negotiable movements, law enforcement intelligence; criminal records; supervisory and regulatory information; and information with company registries etc. Where applicable, it would also include reports on cash transactions, foreign currency transactions, wire transfers records, information from other government agencies including security agencies; tax authorities, asset registries, benefits agencies, NPOs authorities; and information which can be obtained through compulsory measures from financial institutions and DNFBPs including CDD information and transaction records, as well as information from open sources.

6.2. To what extent are the competent authorities receiving or requesting reports (e.g., STRs, reports on currency and bearer negotiable instruments) that contain relevant and accurate information that assists them to perform their duties?

6.3. To what extent is FIU analysis and dissemination supporting the operational needs of competent authorities?

6.4. To what extent do the FIU and other competent authorities co-operate and exchange information and financial intelligence? How securely do the FIU and competent authorities protect the confidentiality of the information they exchange or use?

1. Experiences of law enforcement and other competent authorities (e.g.,

2. Examples of the co-operation between FIUs and other competent authorities and use of financial intelligence (e.g.,

).

3. Information on STRs (e.g.,

4. Information on other financial intelligence and information e.g.,

5. Other documents (e.g.,

).

6. How well does the FIU access and use additional information to analyse and add value to STRs? How does the FIU ensure the rigour of its analytical assessments?

7. How well do competent authorities make use of the information contained in STRs and other financial intelligence to develop operational analysis?

8. To what extent does the FIU incorporate feedback from competent authorities, typologies and operational experience into its functions?

9. What are the mechanisms implemented to ensure full and timely co-operation between competent authorities, and from financial institutions, DNFBPs and other reporting entities to provide the relevant information? Are there any impediments to the access of information?

10. To what extent do the STRs reported contain complete, accurate and adequate information relating to the suspicious transaction?

11. To what extent do the relevant competent authorities review and engage (including outreach by the FIU) reporting entities to enhance financial intelligence reporting?

12. Do the relevant authorities have adequate resources (including IT tools for data mining and analysis of financial intelligence and to protect its confidentiality) to perform its functions?

13. What are the measures implemented to ensure that the FIU has operational independence so that it is not subject to undue influence on AML/CFT matters?

Immediate Outcome 7	Money laundering offences and activities are investigated and offenders are prosecuted and subject to effective, proportionate and dissuasive sanctions.

Money laundering activities, and in particular major proceeds-generating offences, are investigated; offenders are successfully prosecuted; and the courts apply effective, proportionate and dissuasive sanctions to those convicted. This includes pursuing parallel financial investigations and cases where the associated predicate offences occur outside the country, and investigating and prosecuting stand-alone money laundering offences. The component parts of the systems (investigation, prosecution, conviction, and sanctions) are functioning coherently to mitigate the money laundering risks. Ultimately, the prospect of detection, conviction, and punishment dissuades potential criminals from carrying out proceeds generating crimes and money laundering.

This outcome relates primarily to Recommendations 3, 30 and 31, and also elements of Recommendations 1, 2, 15, 32, 37, 39 and 40.

Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent to which law enforcement agencies are seeking appropriate assistance from their foreign counterparts in cross-border money laundering cases.

Core Issues to be considered in determining if the Outcome is being achieved

7.1. How well, and in what circumstances are potential cases of ML identified and investigated (including through parallel financial investigations)?

7.2. To what extent are the types of ML activity being investigated and prosecuted consistent with the country's threats and risk profile and national AML/CFT policies?

7.3. To what extent are different types of ML cases prosecuted (foreign predicate offence, third-party laundering, stand-alone offence[102] etc.) and offenders convicted?

---

102 is the laundering of proceeds by a person who was not involved in the commission of the predicate offence. is the laundering of proceeds by a person who was involved in the commission of the predicate offence.
refers to the prosecution of ML offences independently, without also necessarily prosecuting the predicate offence. This could be particularly relevant inter alia i) when there is insufficient evidence of the particular predicate offence that gives rise to the criminal proceeds; or ii) in situations where there is a lack of territorial jurisdiction over the predicate offence. The proceeds may have been laundered by the defendant (self-laundering) or by a third party (third party ML).

7.4. To what extent are the sanctions applied against natural or legal persons convicted of ML offences effective, proportionate and dissuasive?

7.5.

10. Are there other aspects of the investigative, prosecutorial or judicial process that impede or hinder ML prosecutions and sanctions?

11. Do the competent authorities have adequate resources (including financial investigation tools) to manage their work or address the ML risks adequately?

12. Are dedicated staff/units in place to investigate ML? Where resources are shared, how are ML investigations prioritised?

Immediate Outcome 8	Proceeds and instrumentalities of crime are confiscated.

Criminals are deprived (through timely use of provisional and confiscation measures) of the proceeds and instrumentalities of their crimes (both domestic and foreign) or of property of an equivalent value. Confiscation includes proceeds recovered through criminal, civil or administrative processes; confiscation arising from false cross-border disclosures or declarations; and restitution to victims (through court proceedings). The country manages seized or confiscated assets, and repatriates or shares confiscated assets with other countries. Ultimately, this makes crime unprofitable and reduces both predicate crimes and money laundering.

This outcome relates primarily to Recommendations 1, 4, 32 and also elements of Recommendations 15, 30, 31, 37, 38, and 40.

Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent which law enforcement and prosecutorial agencies are seeking appropriate assistance from their foreign counterparts in relation to cross-border proceeds and instrumentalities of crime.

Core Issues to be considered in determining if the Outcome is being achieved

8.1. To what extent is confiscation of criminal proceeds, instrumentalities and property of equivalent value pursued as a policy objective?

8.2. How well are the competent authorities confiscating[103] (including repatriation, sharing and restitution) the proceeds and instrumentalities of crime, and property of an equivalent value, involving domestic and foreign predicate offences and proceeds which have been moved to other countries?

8.3. To what extent is confiscation regarding falsely / not declared or disclosed cross-border movements of currency and bearer negotiable instruments being addressed and applied as

an effective, proportionate and dissuasive sanction by border/custom or other relevant authorities?

8.4. How well do the confiscation results reflect the assessments(s) of ML/TF risks and national AML/CFT policies and priorities?

1. Experiences and examples of confiscation proceedings (e.g.,

2. Information on confiscation (e.g.,

).

3. Other relevant information (;

4. What are the measures and approach adopted by competent authorities to target proceeds and instrumentalities of crime (including major proceeds-generating crimes and those that do not originate domestically or have flowed overseas)?

5. How do authorities decide, at the outset of a criminal investigation, to commence a financial investigation, with a view to confiscation?

6. How well are competent authorities identifying and tracing proceeds and instrumentalities of crimes or assets of equivalent value? How well are provisional measures (freeze or seizures) used to prevent the flight or dissipation of assets?

7. What is the approach adopted by the country to detect and confiscate cross-border currency and bearer negotiable instruments that are suspected to relate to ML/TF and associated predicate offences or that are falsely / not declared or disclosed?

8. What are the measures adopted to preserve and manage the value of seized/confiscated assets?

9. Are there other aspects of the investigative, prosecutorial or judicial process that promote or hinder the identification, tracing and confiscation of proceeds and instrumentalities of crime or assets of equivalent value?

10. Do the relevant competent authorities have adequate resources to perform their functions adequately?

Immediate Outcome 9	Terrorist financing offences and activities are investigated and persons who finance terrorism are prosecuted and subject to effective, proportionate and dissuasive sanctions.

Terrorist financing activities are investigated; offenders are successfully prosecuted; and courts apply effective, proportionate and dissuasive sanctions to those convicted. When appropriate, terrorist financing is pursued as a distinct criminal activity and financial investigations are conducted to support counter terrorism investigations, with good co-ordination between relevant authorities. The components of the system (investigation, prosecution, conviction and sanctions) are functioning coherently to mitigate the terrorist financing risks. Ultimately, the prospect of detection, conviction and punishment deters terrorist financing activities.

This outcome relates primarily to Recommendations 5, 30, 31 and 39, and also elements of Recommendations 1, 2, 15, 32, 37 and 40.

1) Assessors should be aware that some elements of this outcome may involve material of a sensitive nature (information that is gathered for national security purposes) which countries may be reluctant or not able to make available to assessors.

2) Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent which law enforcement and prosecutorial agencies are seeking appropriate assistance from their foreign counterparts in cross-border terrorist financing cases.

Core Issues to be considered in determining if the Outcome is being achieved

9.1. To what extent are the different types of TF activity (collection, movement and use of funds or other assets) prosecuted and offenders convicted? Is this consistent with the country's TF risk profile?

9.2. How well are cases of TF identified, and investigated? To what extent do the investigations identify the specific role played by the terrorist financier?

9.3. To what extent is the investigation of TF integrated with, and used to support, national counter-terrorism strategies and investigations (identification and designation of terrorists, terrorist organisations and terrorist support networks)?

9.4. To what extent are the sanctions or measures applied against natural and legal persons convicted of TF offences effective, proportionate and dissuasive?

9.5. To what extent is the objective of the outcome achieved by employing other criminal justice, regulatory or other measures to disrupt TF activities where it is not practicable to secure a TF conviction?

1. Experiences and examples of TF investigations and prosecutions (e.g.,

2. Information on TF investigations, prosecutions and convictions (e.g.,

e.g.,

).

3. What are the measures taken to identify, initiate and prioritise TF cases to ensure prompt investigation and action against major threats and to maximise disruption?
4. To what extent and how quickly can competent authorities obtain and access relevant financial intelligence and other information required for TF investigations and prosecutions?
5. What are the underlying considerations for decisions made not to proceed with prosecutions for a TF offence?
6. To what extent do the authorities apply specific action plans or strategies to deal with particular TF threats and trends? Is this consistent with the national AML/CFT policies, strategies and risks?
7. How well do law enforcement authorities, the FIU, counter-terrorism units and other security and intelligence agencies co-operate and co-ordinate their respective tasks associated with this outcome?
8. Are there other aspects of the investigative, prosecutorial or judicial process that impede or hinder TF prosecutions, sanctions or disruption?
9. Do the competent authorities have adequate resources (including financial investigation tools) to manage their work or address the TF risks adequately?
10. Are dedicated staff/units in place to investigate TF? Where resources are shared, how are TF investigations prioritised?

Immediate Outcome 10	Terrorists, terrorist organisations and terrorist financiers are prevented from raising, moving and using funds, and from abusing the NPO sector.

Terrorists, terrorist organisations and terrorist support networks are identified and deprived of the resources and means to finance or support terrorist activities and organisations. This includes proper implementation of targeted financial sanctions against persons and entities designated by the United Nations Security Council and under applicable national or regional sanctions regimes. The country also has a good understanding of the terrorist financing risks and takes appropriate and proportionate actions to mitigate those risks, including measures that prevent the raising and moving of funds through entities or methods which are at greatest risk of being misused by terrorists. Ultimately, this reduces terrorist financing flows, which would prevent terrorist acts.

).

2. Examples of interventions and confiscation (e.g.,

3. Information on targeted financial sanctions (e.g.,

).

4. Information on sustained outreach and targeted risk-based supervision and monitoring of NPOs that the country has identified as being at risk of terrorist financing abuse (

).

5. What measures has the country adopted to ensure the proper implementation of targeted financial sanctions without delay? How are those designations and obligations communicated to financial institutions, DNFBPs, VASPs and the general public in a timely manner?

6. How well are the procedures and mechanisms implemented for (i) identifying targets for designation / listing, (ii) freezing / unfreezing, (iii) de-listing, and (iv) granting exemption? How well is the relevant information collected?

7. To what extent is the country utilising the tools provided by UNSCRs 1267 and 1373 to freeze and prevent the financial flows of terrorists?

8. How well do the systems for approving or licensing the use of assets by designated entities for authorised purposes comply with the requirements set out in the relevant UNSCRs (UNSCR 1452 and any successor resolutions)?

9. What is the approach adopted by competent authorities to target terrorist assets? To what extent are assets tracing, financial investigations and provisional measures (freezing and seizing) used to complement the approach?

10. To what extent are all four of the following elements being used to identify, prevent and combat terrorist financing abuse of NPOs: (a) sustained outreach, (b) targeted risk-based supervision or monitoring, (c) effective investigation and information gathering, and (d) effective mechanisms for international cooperation. To what extent are the measures being applied focused and proportionate and in line with the risk-based approach such that NPOs are protected from terrorist financing abuse and legitimate charitable activities are not disrupted or discouraged?

11. To what extent are appropriate investigative, criminal, civil or administrative actions, co-operation and coordination mechanisms applied to NPOs suspected of being exploited by, or

actively supporting terrorist activity or terrorist organisations? Do the appropriate authorities have adequate resources to perform their outreach / supervision / monitoring / investigation duties effectively?

12. How well do NPOs understand their vulnerabilities and comply with the measures to protect themselves from the threat of terrorist abuse?

13. Are there other aspects of the investigative, prosecutorial or judicial process that promote or hinder the identification, tracing and deprivation of assets and instrumentalities related to terrorists, terrorist organisations or terrorist financiers?

14. Do the relevant competent authorities have adequate resources to manage their work or address the terrorist financing risks adequately

15. Where resources are shared, how are terrorist financing related activities prioritised?

Immediate Outcome 11	Persons and entities involved in the proliferation of weapons of mass destruction are prevented from raising, moving and using funds, consistent with the relevant UNSCRs.

Persons and entities designated by the United Nations Security Council Resolutions (UNSCRs) on proliferation of weapons of mass destruction (WMD) are identified, deprived of resources, and prevented from raising, moving, and using funds or other assets for the financing of proliferation. Targeted financial sanctions are fully and properly implemented without delay; monitored for compliance and there is adequate co-operation and co-ordination between the relevant authorities to prevent sanctions from being evaded, and to develop and implement policies and activities to combat the financing of proliferation of WMD.

This outcome relates to Recommendation 7 and elements of Recommendations 2 and 15.

Core Issues to be considered in determining if the Outcome is being achieved

11.1. How well is the country implementing, without delay, targeted financial sanctions concerning the UNSCRs relating to the combating of financing of proliferation?

11.2. To what extent are the funds or other assets of designated persons and entities (and those acting on their behalf or at their direction) identified and such persons and entities prevented from operating or from executing financial transactions related to proliferation?

11.3. To what extent do financial institutions, DNFBPs and VASPs comply with, and understand their obligations regarding targeted financial sanctions relating to financing of proliferation?

11.4. How well are relevant competent authorities monitoring and ensuring compliance by financial institutions, DNFBPs and VASPs with their obligations regarding targeted financial sanctions relating to financing of proliferation?

1. Examples of investigations and intervention relating to financing of proliferation (e.g.,

e.g.,

2. Information on targeted financial sanctions relating to financing of proliferation (e.g.,

).

3. Monitoring and other relevant information relating to financing of proliferation (

ANNEX I

SUPRA-NATIONAL ASSESSMENT

[Annex to be finalised]

ANNEX II

MUTUAL EVALUATION REPORT TEMPLATE

This template should be used as the basis for preparing Mutual Evaluation Reports (MERs) for evaluations conducted using the FATF's 2013 Methodology. It sets out the structure of the MER, and the information and conclusions which should be included in each section.

The template incorporates guidance to assessors on how the MER should be written, including what information should be included, and the way analysis and conclusions should be presented. This guidance is clearly indicated in grey shaded text (like this section). It should not appear in the final MER. Text which appears in unshaded script (including chapter and section headings and pro-forma paragraphs) should be included in the final report (with any square brackets completed as necessary).

Assessors should note that a completed MER is expected to be 100 pages or less (together with a technical annex of 60 pages or less). There is no predetermined limit to the length of each chapter, and assessors may decide to devote more, or less, attention to any specific issue, as the country's situation requires. Nevertheless, assessors should ensure the MER does not become excessively long, and should be prepared to edit their analysis as necessary. In order to ensure the right balance in the final report, assessors should aim to summarise technical compliance with each Recommendation in one or two paragraphs, totalling a maximum of half a page. Assessors may be very brief on issues where there is little or no substance to report (e.g. a single sentence description of technical compliance would be sufficient for Recommendations rated "compliant").

The Executive Summary is intended to serve as the basis for Plenary discussion of each Mutual Evaluation, and to provide clear conclusions and recommendations for ministers, legislators, and other policymakers in the assessed country. It is therefore important that it does not exceed five pages, and that assessors follow the guidance in that section on the selection and presentation of issues.

Assessors are urged to include statistics and case studies where relevant. These should be provided in the format shown at the end of the template.

1. This report summarises the AML/CFT measures in place in [name of assessed country] as at the date of the on-site visit [date]. It analyses the level of compliance with the FATF 40 Recommendations and the level of effectiveness of [country]'s AML/CFT system, and provides recommendations on how the system could be strengthened.

Key Findings

a)

b) Assessors should provide a short summary of the key findings, both positive and negative, taking into account the country's risk profile and AML/CFT regime. The focus should be on 5-7 points raised in the report rather than a summary of each and every single IO or chapter.

2.

3. This section should give a brief summary (1-2 paragraphs) of the country's ML/TF risk situation and context – focusing in particular on the country's exposure to domestic and international ML/TF risks, and identifying the issues and sectors that present the greatest risks. Assessors should note any areas where they have identified material risks which were not considered in the country's own risk assessment, or where they consider the level of risk to be significantly different.

4.

5. Assessors should give a very brief overview of the AML/CFT situation in the country, based on the level of both compliance and effectiveness.

6. In the sections below, assessors should briefly summarise, the overall level of effectiveness of the country's AML/CFT system in each thematic area as well as the overall level of technical compliance with the FATF Recommendations, noting any areas of particular strength or weakness. Assessors should also note the progress since the last MER, highlighting any significant changes and flagging any key issues that remain outstanding from the previous assessment.

7.

8. Assessors should set out their main findings in more details and for each chapter of the main report as structured in sub-sections below. Any relevant factors of importance would need to be highlighted such as high-risk or significant contextual or other issues for the country; ar

non-compliance. Each section should contain a brief summary of the assessor's conclusions on the overall level of compliance and effectiveness – including highlighting key findings for each relevant IOs- and any actions required. The description should include sufficient detail for readers to understand assessors' conclusions and the main issues/positive features. However, it should not include a full analysis, and should not defend assessors' conclusions or anticipate and rebut objections. Any additional information should be set out in the main body of the report, rather than in the executive summary.

9.

10.

11.

12.

13.

14.

a)

b)

This report summarises the AML/CFT measures in place as at the date of the on-site visit. It analyses the level of compliance with the FATF 40 Recommendations and the level of effectiveness of theAML/CFT system, and recommends how the system could be strengthened.

This evaluation was based on the 2012 FATF Recommendations, and was prepared using the 2013 Methodology. The evalua

15.

16. This section should begin with a very brief description of the country's general situation: its size, territorial makeup, population, GDP, and constitutional structure.

17. This section should note any territorial or jurisdictional issues affecting the evaluation, (if the MER includes assessment of territories or regions with different AML/CFT regimes, or if the country is part of a supranational jurisdiction).

18. For any of the information contained in sub-sections 1.1-1.4, assessors should provide a balanced picture where possible thus covering, for example, higher risk or lower risk areas, strengths and weaknesses.

19.

20. This section should set out the ML and TF threats and risks faced by the country. It should include the main underlying threats, drawing on the country's risk assessment and on other relevant information, as set out in the introduction to the methodology. Particular points to cover include:

- the underlying levels of proceeds generating crime in the country, and its nature;
- the country's exposure to cross-border illicit flows (related to crimes in other countries) – including any significant potential role as a transit route for illicit goods or funds;
- any available information on the country's exposure to terrorist financing threats (including the existence of terrorist groups active in the country; or the use of the country as a source of funds or recruits for terrorist groups active in other countries) and financing of proliferation; and
- the ML/TF risks, taking into account vulnerabilities (including vulnerabilities posed by virtual asset activity) and consequences.

21.

22. The above should be framed in the context of the country's understanding and assessment of its own risks. Assessors should set out the arrangements for the preparation of the National Risk Assessment(s), including how the risk assessment(s) was commissioned, how it is structured (e.g. as a single assessment or on the basis of regional/sectoral assessments), how it was prepared and the type of information used in conducting the risk assessment(s), as well as assessors' conclusions on the adequacy of the process. Assessors should set out their views regarding the reasonableness of the conclusions of the assessment(s), as well as any points on which they consider the conclusions were not reasonable, and any additional risks or risk factors which they consider significant, but which were not adequately taken into account in the assessment. If assessors identify such additional risks, they should note

the basis for their judgement, and the credible or reliable sources of information supporting this. In addition assessors should summarise the scoping exercise conducted prior to the onsite in order to identify higher and lower risk issues to be considered in more detail in the course of the assessment. This should include setting out the reasons why they consider each issue to be higher or lower risk, and noting how additional attention was given to these issues in the course of the evaluation.

23.

24. This section should set out the size and general makeup of the economy, and of the financial sector, DNFBP and VASP sectors. It should note the relative importance of different types of financial institution, DNFBP and VASP and their activity, the international role of the country's financial, DNFBP and VASP sectors (if the country is a regional financial centre, an international financial centre, a centre for company formation and registration), and highlight particularly significant features of the country's financial, DNFBP and VASP sectors. This section should also note any other significant factors affecting materiality, as set out in paragraph 8 of the introduction to the Methodology. It should be a brief summary.

25.

26. Assessors should note whether the main structural elements required for an effective AML/CFT system are present in the country (as set out in paragraph 9 of the introduction to the Methodology).

27. If there are serious concerns that any of the structural elements which underpin an effective AML/CFT system is weak or absent, assessors should highlight those concerns in this section. Note that assessors are not expected to reach a general conclusion about the extent to which such factors are present.

28.

29. Assessors should note domestic and international contextual factors that might significantly influence the effectiveness of the country's AML/CFT measures. This could include such factors as the maturity and sophistication of the AML/CFT regime and the institutions which implement it, or issues of corruption or financial exclusion. All other background information necessary for the understanding of the effectiveness analysis in the main chapters of the report should be incorporated here as well including the following:

30.

31. This section should set out the main policies and objectives of the Government for combating money laundering and terrorist financing. It should describe the government's priorities and objectives in these areas, noting where there are also

wider policy objectives (such as financial inclusion) which affect the AML/CFT strategy. Any relevant policies and objectives for combating the financing of proliferation should also be set out in this section.

32.

33. Assessors should give a brief overview of which ministries, agencies, and authorities are responsible for formulating and implementing the government's AML/CFT and proliferation financing policies. Assessors should briefly describe the principal role and responsibilities of each body involved in the AML/CFT strategy, as well as noting the bodies responsible for combating the financing of proliferation. Assessors should indicate any significant changes since the last MER to the institutional framework, including the rationale for those changes. This section should also set out the country's legal framework for AML/CFT and proliferation financing in a brief summary form. Detailed description and analysis of each element is not necessary – this should be included in the technical annex. Assessors should describe the co-operation and coordination mechanisms used by the country to assist the development of AML/CFT policies, and policies for combating the financing of proliferation.

34.

35. In this section, assessors should describe the size and makeup of the financial sector, DNFBP and VASP sectors. The section should note the relative importance of different types of financial institutions and activity, DNFBPs and generic types of virtual asset activities and providers primarily being used in the country. It is important that assessors explain their weighting of the relative importance of the different types of financial institutions, DNFBPs and VASPs to ensure consistent weighting throughout the MER, particularly when assessing IO.3 and IO.4. This is important because the risks, materiality and context varies widely from country to country (e.g. in some countries, a particular type of DNFBP such as TCSPs or casinos may be as (or almost as) important as the banking sector which means that weak supervision or weak preventive measures in that sector would be weighted much more heavily in IO.3 and IO.4 than in countries where such sectors are of lesser importance).

36. Assessors may explain how they have weighted the different sectors, in general terms (e.g. by explaining which sectors were weighted most important, highly important, moderately important or less important) rather than trying to rank each sector's prevalence individually (e.g. 1, 2, 3, 4, 5, 6, 7, 8...) which would be overly granular and a rather artificial distinction given the many different types of financial institutions, DNFBPs and VASPs that are subject to the FATF Recommendations.

37. In this section, the assessors should also describe the international role of the country's financial sector – if the country is a regional financial centre, an international financial centre, or a centre for company formation and registration, and should highlight particularly significant or important features of the country's financial, DNFBP and VASP sectors.

38. They should also summarise the types and key features of financial institutions, DNFBPs and VASPs which exist in the country, and the numbers of each type of

institution, as well as some information relating to the materiality of the sector and the institutions within it. Tables may be used in order to summarise the information.

39.

40. This section should set out the legal (or other enforceable) instruments through which they are applied, and the scope of such obligations. If assessors identify any problems regarding the scope of AML/CFT obligations, they should briefly identify such issues in this section. If countries have exempted specific sectors or activities from the requirements, these exemptions should be noted in this section. Assessors should indicate whether such exemptions meet the criteria set out in R.1, and whether they consider the exemptions justified on the basis of the country's ML/TF risk assessment(s). This section should also note cases where countries have decided, on the basis of risk, to require AML/CFT preventive measures to be applied by additional sectors which are normally outside the scope of the FATF Recommendations.

41.

42. Assessors should briefly describe the types of legal persons and legal arrangements that can be established or created in the country and relevant from an AML/CFT perspective. Basic characteristics of these should be provided as well as their numbers and their significance within the country and in financial and DNFBP sectors. Tables may be used in order to summarise the information. As per sub-section (c), the international elements should be covered in particular the extent to which the country acts as an international centre for the creation or administration of legal persons or arrangements (even if only as a source-of-law jurisdiction); and the extent to which legal persons and arrangements created in another jurisdiction (or under the law of another jurisdiction) hold assets or used in the country.

43.

44. Assessors should set out the institutional arrangements for supervision and oversight of financial institutions, DNFBPs and VASPs, including the roles and responsibilities of regulators, supervisors and SRBs; their general powers and resources. Similarly, this section should also note the institutional framework for legal persons and arrangements, including the authorities (if any) with responsibility for the creation, registration, and supervision of legal persons and arrangements.

45.

104 Assessors should describe the supervisory arrangements in place for financial institutions, DNFBPs and VASPs.

46. Assessors should briefly summarise the international ML/TF risks and threats faced by the country, including the potential use of the country to launder proceeds of crime in other countries and vice-versa. To the extent possible, assessors should identify the country's most significant international partners with respect to ML/TF issues. This section should also note any institutional framework for international cooperation e.g. a Central Authority for MLA.

a)

b) Assessors should briefly summarise their conclusions for this chapter, highlighting the most significant findings. Key findings and key recommended actions should be consistent on the substance without a need to strictly mirror each other.

a) This section should set out a targeted and prioritised set of recommendations on how the country should improve its level of effectiveness and its level of compliance with the FATF Recommendations. The section should include assessors' recommendations regarding the Immediate Outcomes and Recommendations covered in this chapter of the MER. Assessors will therefore need to consider a range of Outcomes and Recommendations, and actions aimed at addressing both technical deficiencies and practical issues of implementation or effectiveness, and decide which actions should be prioritised.

b) Assessors should clearly indicate which Recommendation(s) or Outcome(s) each recommended action is intended to address. Assessors should follow the same general approach when making recommendations in other chapters of the MER.

47. The relevant Immediate Outcome considered and assessed in this chapter is IO.1. The Recommendations relevant for the assessment of effectiveness under this section are R.1, 2, 33 and 34, and elements of R.15.

48. This section should set out assessors' analysis of Immediate Outcome 1. The first paragraph(s) should note any general considerations regarding the country's risks and context which affect the assessment.

49. This section should also summarise assessors' general impression of whether the country appears to exhibit the characteristics of an effective system.

50. Assessors should cover each of the Core Issues in their analysis. Assessors have some flexibility about how they organise the analysis in this section. For some immediate

outcomes, it may be appropriate to consider each of the core issues in turn. For others (e.g. I.O.4) it may be better to set out the analysis sector-by-sector; or (e.g. for I.O.7) to proceed step-by-step with the analysis of each element of the process covered by the Outcome. Whichever approach assessors take to organising their analysis, they should

Overall Conclusion on IO.1

58. [Weighting and conclusion]

60. At the end of this section, assessor . When deciding on the overall level of effectiveness, assessors should take into account: (a) the core issues, (b) any relevant technical compliance issues / deficiencies; (c) risks and contextual factors; and (d) the level of effectiveness in other Immediate Outcomes that are relevant. Assessors should briefly explain their conclusion on the appropriate effectiveness rating. They should be explicit about the weight and importance they attach to the elements taken into account. The conclusion should not duplicate the Key Findings section at the beginning of each chapter and should be, ideally, not more than one or two paragraphs long.

61. Assessors should follow the same general approach when setting out their analysis of effectiveness for all other outcomes.

The following are templates for tables and case studies for use in this section Chapter. Copy and paste where necessary, or remove.

103. The relevant Immediate Outcome considered and assessed in this chapter is IO.4[105]. The Recommendations relevant for the assessment of effectiveness under this section are R.9-23, and elements of R.1, 6, 15 and 29.

[106]

104.

[105] When assessing effectiveness under Immediate Outcome 4, assessors should take into consideration the risk, context and materiality of the country being assessed. Assessors should clearly explain these factors in Chapter One of the mutual evaluation report under the heading of Financial Institutions, DNFBPs and VASPs, as required in the instructions under that heading in the Methodology.

[106] The first paragraph should give a short summary of what relative importance assessors have given to the different types of financial institutions, designated non-financial businesses and professions and VASPs, taking into account the risk, context and materiality of the country being assessed. This should be supplemented by a cross-reference to the more detailed information in Chapter One on how each sector has been weighted (based on risk, context and materiality) (as required in the instructions under that heading in the Methodology).

LEGAL BASIS OF REQUIREMENTS ON FINANCIAL INSTITUTIONS AND DNFBPS AND VASPS

1. All requirements for financial institutions, DNFBPs or VASPs should be introduced either (a) in law (see the specific requirements in Recommendations 10, 11 and 20 in this regard), or (b) for all other cases, in law or enforceable means (the country has discretion).

2. In Recommendations 10, 11 and 20, the term " " refers to any legislation issued or approved through a Parliamentary process or other equivalent means provided for under the country's constitutional framework, which imposes mandatory requirements with sanctions for non-compliance. The sanctions for non-compliance should be effective, proportionate and dissuasive (see Recommendation 35). The notion of law also encompasses judicial decisions that impose relevant requirements, and which are binding and authoritative in all parts of the country.

3. The term " " refers to regulations, guidelines, instructions or other documents or mechanisms that set out enforceable AML/CFT requirements in mandatory language with sanctions for non-compliance, and which are issued or approved by a competent authority. The sanctions for non-compliance should be effective, proportionate and dissuasive (see Recommendation 35).

4. In considering whether a document or mechanism has requirements that amount to , the following factors should be taken into account:

   (a) There must be a document or mechanism that sets out or underpins requirements addressing the issues in the FATF Recommendations, and providing clearly stated requirements which are understood as such. For example:

      (i) if particular measures use the word or , this should be considered mandatory;

      (ii) if they use , this could be mandatory if both the regulator and the regulated institutions demonstrate that the actions are directly or indirectly required and are being implemented; language such as measures , or institutions is less likely to be regarded as mandatory. In any case where weaker language is used, there is a presumption that the language is not mandatory (unless the country can demonstrate otherwise).

   (b) The document/mechanism must be issued or approved by a competent authority.

   (c) There must be sanctions for non-compliance (sanctions need not be in the same document that imposes or underpins the requirement, and can be in another document, provided that there are clear links between the requirement and the available sanctions), which should be effective, proportionate and dissuasive. This involves consideration of the following issues:

(i) there should be an adequate range of effective, proportionate and dissuasive sanctions available if persons fail to comply with their obligations;

(ii) the sanctions should be directly or indirectly applicable for a failure to comply with an AML/CFT requirement. If non-compliance with an AML/CFT requirement does not have a sanction directly attached to it, then the use of sanctions for violation of broader requirements, such as not having proper systems and controls or not operating in a safe and sound manner, is satisfactory provided that, at a minimum, a failure to meet one or more AML/CFT requirements could be (and has been as appropriate) adequately sanctioned without a need to prove additional prudential failures unrelated to AML/CFT; and

(iii) whether there is satisfactory evidence that effective, proportionate and dissuasive sanctions have been applied in practice.

5. In all cases it should be apparent that financial institutions, DNFBPs and VASPs understand that sanctions would be applied for non-compliance and what those sanctions could be.

GENERAL GLOSSARY

Terms	Definitions
Accounts	References to "accounts" should be read as including other similar business relationships between financial institutions and their customers.
Accurate	Please refer to the IN to Recommendation 16.
Agent	For the purposes of Recommendations 14 and 16, means any natural or legal person providing MVTS on behalf of an MVTS provider, whether by contract with or under the direction of the MVTS provider.
Appropriate authorities	Please refer to the IN to Recommendation 8.
Associate NPOs	Please refer to the IN to Recommendation 8.
Batch transfer	Please refer to the IN to Recommendation 16.
Bearer negotiable instruments	includes monetary instruments in bearer form such as: traveller's cheques; negotiable instruments (including cheques, promissory notes and money orders) that are either in bearer form, endorsed without restriction, made out to a fictitious payee, or otherwise in such form that title thereto passes upon delivery; incomplete instruments (including cheques, promissory notes and money orders) signed, but with the payee's name omitted.
Bearer shares	refers to negotiable instruments that accord ownership in a legal person to the person who possesses the bearer share certificate.
Beneficial owner	refers to the natural person(s) who ultimately[111] owns or controls a customer[112] and/or the natural person on whose behalf a transaction is being conducted. It also includes those persons who exercise ultimate effective control over a legal person or arrangement.
Beneficiaries	Please refer to the IN to Recommendation 8.
Beneficiary	The meaning of the term in the FATF Recommendations depends on the context: ■ In trust law, a beneficiary is the person or persons who are entitled to the benefit of any trust arrangement. A beneficiary can be a natural or

111 Reference to "ultimately owns or controls" and "ultimate effective control" refer to situations in which ownership/control is exercised through a chain of ownership or by means of control other than direct control.

112 This definition should also apply to beneficial owner of a beneficiary under a life or other investment linked insurance policy.

Terms	Definitions
	legal person or arrangement. All trusts (other than charitable or statutory permitted non-charitable trusts) are required to have ascertainable beneficiaries. While trusts must always have some ultimately ascertainable beneficiary, trusts may have no defined existing beneficiaries but only objects of a power until some person becomes entitled as beneficiary to income or capital on the expiry of a defined period, known as the accumulation period. This period is normally co-extensive with the trust perpetuity period which is usually referred to in the trust deed as the trust period. ■ In the context of life insurance or another investment linked insurance policy, a beneficiary is the natural or legal person, or a legal arrangement, or category of persons, who will be paid the policy proceeds when/if an insured event occurs, which is covered by the policy. Please also refer to the Interpretive Notes to Recommendation 16.
Beneficiary Financial Institution	Please refer to the IN to Recommendation 16.
Competent authorities	refers to all public authorities[113] with designated responsibilities for combating money laundering and/or terrorist financing. In particular, this includes the FIU; the authorities that have the function of investigating and/or prosecuting money laundering, associated predicate offences and terrorist financing, and seizing/freezing and confiscating criminal assets; authorities receiving reports on cross-border transportation of currency & BNIs; and authorities that have AML/CFT supervisory or monitoring responsibilities aimed at ensuring compliance by financial institutions and DNFBPs with AML/CFT requirements. SRBs are not to be regarded as competent authorities.
Confiscation	The term which includes forfeiture where applicable, means the permanent deprivation of funds or other assets by order of a competent authority or a court. Confiscation or forfeiture takes place through a judicial or administrative procedure that transfers the ownership of specified funds or other assets to be transferred to the State. In this case, the person(s) or entity(ies) that held an interest in the specified funds or other assets at the time of the confiscation or forfeiture loses all rights, in principle, to the confiscated or forfeited funds or other assets. Confiscation or forfeiture orders are usually linked

[113] This includes financial supervisors established as independent non-governmental authorities with statutory powers.

Terms	Definitions
	to a criminal conviction or a court decision whereby the confiscated or forfeited property is determined to have been derived from or intended for use in a violation of the law.
Core Principles	refers to the Core Principles for Effective Banking Supervision issued by the Basel Committee on Banking Supervision, the Objectives and Principles for Securities Regulation issued by the International Organization of Securities Commissions, and the Insurance Supervisory Principles issued by the International Association of Insurance Supervisors.
Correspondent banking	is the provision of banking services by one bank (the "correspondent bank") to another bank (the "respondent bank"). Large international banks typically act as correspondents for thousands of other banks around the world. Respondent banks may be provided with a wide range of services, including cash management (e.g. interest-bearing accounts in a variety of currencies), international wire transfers, cheque clearing, payable-through accounts and foreign exchange services.
Country	All references in the FATF Recommendations to or apply equally to territories or jurisdictions.
Cover Payment	Please refer to the IN. to Recommendation 16.
Criminal activity	

Terms	Definitions
	■ illicit trafficking in stolen and other goods; ■ corruption and bribery; ■ fraud; ■ counterfeiting currency; ■ counterfeiting and piracy of products; ■ environmental crime (for example, criminal harvesting, extraction or trafficking in protected species of wild fauna and flora, precious metals and stones, other natural resources, or waste); ■ murder, grievous bodily injury; ■ kidnapping, illegal restraint and hostage-taking; ■ robbery or theft; ■ smuggling; (including in relation to customs and excise duties and taxes); ■ tax crimes (related to direct taxes and indirect taxes); ■ extortion; ■ forgery; ■ piracy; and ■ insider trading and market manipulation. When deciding on the range of offences to be covered as predicate offences under each of the categories listed above, each country may decide, in accordance with its domestic law, how it will define those offences and the nature of any particular elements of those offences that make them serious offences.
Designated non-financial businesses and professions	means: a) Casinos[114] b) Real estate agents. c) Dealers in precious metals. d) Dealers in precious stones. e) Lawyers, notaries, other independent legal professionals and accountants – this refers to sole practitioners, partners or employed professionals within professional firms. It is not meant to refer to 'internal' professionals that are employees of other types of businesses, nor to

[114] References to throughout the FATF Standards include internet- and ship-based casinos.

Terms	Definitions

professionals working for government agencies, who may already be subject to AML/CFT measures.

f) Trust and Company Service Providers refers to all persons or businesses that are not covered elsewhere under these Recommendations, and which as a business, provide any of the following services to third parties:

- acting as a formation agent of legal persons;
- acting as (or arranging for another person to act as) a director or secretary of a company, a partner of a partnership, or a similar position in relation to other legal persons;
- providing a registered office; business address or accommodation, correspondence or administrative address for a company, a partnership or any other legal person or arrangement;
- acting as (or arranging for another person to act as) a trustee of an express trust or performing the equivalent function for another form of legal arrangement;
- acting as (or arranging for another person to act as) a nominee shareholder for another person.

Terms	Definitions
	(2006) (the 1718 Sanctions Committee) pursuant to Security Council resolution 1718 (2006); and (v) any natural or legal person or entity designated for the application of targeted financial sanctions pursuant to Security Council resolution 2231 (2015) and any future successor resolutions by the Security Council.
Designation	The term refers to the identification of a person[115], individual or entity that is subject to targeted financial sanctions pursuant to: ■ United Nations Security Council resolution 1267 (1999) and its successor resolutions; ■ Security Council resolution 1373 (2001), including the determination that the relevant sanctions will be applied to the person or entity and the public communication of that determination; ■ Security Council resolution 1718 (2006) and any future successor resolutions; ■ Security Council resolution 2231 (2015) and any future successor resolutions; and ■ any future Security Council resolutions which impose targeted 2.7 ( )h2.64a(co)14.2 (m)10.9 lioare 1

False declaration	Please refer to the IN to Recommendation 32.
False disclosure	Please refer to the IN to Recommendation 32.
Financial group	

GLOSSARY

Terms	Definitions
Fundamental principles of domestic law	This refers to the basic legal principles upon which national legal systems are based and which provide a framework within which national laws are made and powers are exercised. These fundamental principles are normally contained or expressed within a national Constitution or similar document, or through decisions of the highest level of court having the power to make binding interpretations or determinations of national law. Although it will vary from country to country, some examples of such fundamental principles include rights of due process, the presumption of innocence, and a person's right to effective protection by the courts.
Funds	The term refers to assets of every kind, whether corporeal or incorporeal, tangible or intangible, movable or immovable, however acquired, and legal documents or instruments in any form, including electronic or digital, evidencing title to, or interest in, such assets.
Funds or other assets	The term means any assets, including, but not limited to, financial assets, economic resources (including oil and other natural resources), property of every kind, whether tangible or intangible, movable or immovable, however acquired, and legal documents or instruments in any form, including electronic or digital, evidencing title to, or interest in, such funds or other assets, including, but not limited to, bank credits, travellers cheques, bank cheques, money orders, shares, securities, bonds, drafts, or letters of credit, and any interest, dividends or other income on or value accruing from or generated by such funds or other assets, and any other assets which potentially may be used to obtain funds, goods or services.
Identification data	The term refers to reliable, independent source documents, data or information.
Intermediary financial institution	Please refer to the IN to Recommendation 16.
International organisations	International organisations are entities established by formal political agreements between their member States that have the status of international treaties; their existence is recognised by law in their member countries; and they are not treated as resident institutional units of the countries in which they are located. Examples of international organisations include the United Nations and affiliated international organisations such as the International Maritime Organisation; regional international organisations such as the Council of Europe, institutions of the European Union, the Organization for Security and Co-operation in Europe and the Organization of American States; military international organisations such as the North Atlantic Treaty Organization, and economic organisations such as the World Trade Organisation or the Association of Southeast Asian Nations, etc.

Terms	Definitions
Law	Please refer to the Note on the Legal Basis of requirements on Financial Institutions and DNFBPs.
Legal arrangements	refers to express trusts or other similar legal arrangements. Examples of other similar arrangements (for AML/CFT purposes) include fiducie, treuhand and fideicomiso.
Legal persons	refers to any entities other than natural persons that can establish a permanent customer relationship with a financial institution or otherwise own property. This can include companies, bodies corporate, foundations, anstalt, partnerships, or associations and other relevantly similar entities.
Money laundering offence	References (except in Recommendation 3) to a refer not only to the primary offence or offences, but also to ancillary offences.
Money or value transfer service	refers to financial services that involve the acceptance of cash, cheques, other monetary instruments or other stores of value and the payment of a corresponding sum in cash or other form to a beneficiary by means of a communication, message, transfer, or through a clearing network to which the MVTS provider belongs. Transactions performed by such services can involve one or more intermediaries and a final payment to a third party, and may include any new payment methods. Sometimes these services have ties to particular geographic regions and are described using a variety of specific terms, including , , and .
Non-conviction based confiscation	means confiscation through judicial procedures related to a criminal offence for which a criminal conviction is not required.
Non-profit organisations	Please refer to the IN to Recommendation 8.
Originator	Please refer to the IN to Recommendation 16.
Ordering financial institution	Please refer to the IN to Recommendation 16.
Payable-through accounts	Please refer to the IN to Recommendation 13.
Physical cross-border transportation	Please refer to the IN. to Recommendation 32.

Terms	Definitions
Politically Exposed Persons (PEPs)	are individuals who are or have been entrusted with prominent public functions by a foreign country, for example Heads of State or of government, senior politicians, senior government, judicial or military officials, senior executives of state owned corporations, important political party officials.

Terms	Definitions
Seize	The term means to prohibit the transfer, conversion, disposition or movement of property on the basis of an action initiated by a competent authority or a court under a freezing mechanism. However, unlike a freezing action, a seizure is effected by a mechanism that allows the competent authority or court to take control of specified property. The seized property remains the property of the natural or legal person(s) that holds an interest in the specified property at the time of the seizure, although the competent authority or court will often take over possession, administration or management of the seized property.
Self-regulatory body (SRB)	A SRB is a body that represents a profession (e.g. lawyers, notaries, other independent legal professionals or accountants), and which is made up of members from the profession, has a role in regulating the persons that are qualified to enter and who practise in the profession, and also performs certain supervisory or monitoring type functions. Such bodies should enforce rules to ensure that high ethical and moral standards are maintained by those practising the profession.
Serial Payment	Please refer to the IN. to Recommendation 16.
Settlor	are natural or legal persons who transfer ownership of their assets to trustees by means of a trust deed or similar arrangement.
Shell bank	means a bank that has no physical presence in the country in which it is incorporated and licensed, and which is unaffiliated with a regulated financial group that is subject to effective consolidated supervision. means meaningful mind and management located within a country. The existence simply of a local agent or low-level staff does not constitute physical presence.
Should	For the purposes of assessing compliance with the FATF Recommendations, the word has the same meaning as
Straight-through processing	Please refer to the IN. to Recommendation 16.
Supervisors	refers to the designated competent authorities or non-public bodies with responsibilities aimed at ensuring compliance by financial institutions (“ ”) and/or DNFBPs with requirements to combat money laundering and terrorist financing. Non-public bodies (which could include certain types of SRBs) should have the power to supervise and sanction financial institutions or DNFBPs in relation to the AML/CFT requirements. These non-public bodies should also be empowered by law to exercise the functions they

[121] Including Core Principles supervisors who carry out supervisory functions that are related to the implementation of the FATF Recommendations.

Terms	Definitions
	perform, and be supervised by a competent authority in relation to such functions.
Targeted financial sanctions	The term means both asset freezing and prohibitions to prevent funds or other assets from beinge (r91 (sv(r)6 (a(s)6 (e)-1.2 (il)5.5 (L T0 1MC)-

Terms	Definitions
Terrorist financing offence	References (except in Recommendation 4) to a refer not only to the primary offence or offences, but also to ancillary offences.
Terrorist organisation	The term refers to any group of terrorists that: (i) commits,

	financial assets that are already covered elsewhere in the FATF Recommendations
Virtual Asset Service Providers	Virtual asset service provider means any natural or legal person who is not covered elsewhere under the Recommendations, and as a business conducts one

INFORMATION ON UPDATES MADE TO THE FATF METHODOLOGY

The following amendments have been made to the FATF Methodology since the text was adopted in February 2013. ONo]f5

Date	Type of amendments	Sections subject to amandments
Nov 2017	Revision of footnote to Recommendation 25.	• R.25 – page 75-76 To amend footnote 73 to the methodology for R.25 to provide guidance on how to identify other legal arrangements that fall within the scope of R.25 and IO.5 because of characteristics and features which are similar to express trusts and could be particularly vulnerable from a ML/TF perspective, and to ensure a consistent approach across mutual evaluations.
Feb 2018	Revision of Recommendations 18 and 21	• R.18 – pages 63-64 and R.21 - page 67 To amend R.18 and R.21 to reflect the November 2017 amendments to the FATF Standards (INR.18 and R.21) which clarified the requirements on sharing of information related to unusual or suspicious transactions within financial groups, and the interaction of these requirements with tipping-off provisions.
Oct 2018	Revision of Recommendation 2 and Immediate Outcome 1	• R.2 – page 28 and IO.1 – page 99 To reflect the February 2018 amendments to the FATF Standards (R.2) which clarify the need for compatability of AML/CFT requirements and data protection and privacy rules and build on the conclusions of RTMG's report on inter-agency CT/CFT information sharing.
Oct 2018	Revisions to Chapter 1 and addition of footnotes in Chapters 5 and 6 related to Immediate Outcomes 3 and 4	• Chapter 1 – page 138 • Chapter 5 – page 146, and Chapter 6 – page 147 Addition of footnotes to clarify the expectations when assessing effectiveness under IO.3 and IO.4, taking into consideration the risk, context and materiality of the country being assessed.
Feb 2019	Revisions to Immediate Outcomes 3 and 4 Addition of notes to assessors and footnotes	• Outcome 3 - pages 105-106 • Outcome 4 - pages 109-110 Addition of notes to assessors and footnotes to provide further guidance on how to assess the relative importance of the different sectors of financial institutions and DNFBPs.

Date	Type of amendments	Sections subject to amandments
Oct 2019	Revisions to Recommendation 15 and Immediate Outcomes 1 - 4, and 6 – 11 to reflect amendments to the FATF Standards (R.15, INR.15 and Glossary terms) incorporating virtual assets and virtual asset service providers	• Introduction paragraph 15 – page 8 New paragraph and footnote to provide guidance on how to assess requirements relating to virtual assets and virtual asset service providers. • Introduction paragraphs 21, 22, 24 and diagram at paragraph 44 – pages 9, 10 and 18 Addition of references to virtual assets and virtual asset service providers. • Recommendation 15, Note to assessors and criteria 15.3 – 15.11 – pages 54-57 • Immediate Outcomes 3 and 4 – pages 105 - 112 Addition of further guidance on how to assess requirements relating to virtual assets and virtual asset service providers and new criteria to reflect the amendments to the FATF Standards (R.15, INR.15 and Glossary terms “virtual assets” and “virtual asset service provider”). • Immediate Outcomes 1, 2, 3, 4, 6, 7, 8, 9, 10 and 11 – pages 97, 102, 105-108, 109-112, 116, 119, 122, 124, 126-127, and 129-130. Addition of reference to R.15, or elements of R.15, as being related to the outcome and reference to VASPs as needed.
Nov 2020	Clarification to Recommendation 17	• R.17 – page 60 Addition of footnote to clarify that R.17 does not apply to third party outsourcing and agency relationships, as noted in INR.17.
Oct 2021	Revision of the Glossary definition of ‘designated categories of offences’	• Page 178 Revision of the Glossary definition of ‘designated categories of offences’.
June 2023	Addition of footnote to clarify the requirements of criterion 36.2	• R. 36 – page 88 Addition of a footnote clarifying the distinction between FATF and UNODC IRM assessments.
